

Visualizing Sports Data

Lecturers

Statistics/Data Science:

Prof. Dr. Philipp Doeblner (doebler@statistik.tu-dortmund.de)

Prof. Dr. Andreas Groll (groll@statistik.tu-dortmund.de)

Prof. Dr. Katja Ickstadt (ickstadt@statistik.uni-dortmund.de)

Journalism:

Claus Hesseling (claus.hesseling@tu-dortmund.de)

Tobias Schweigmann (Tobias.Schweigmann@tu-dortmund.de)

Christina Elmer und Patrick Stotz (Gastreferenten vom Spiegel)

Modules	SWS	Credits
old: BS XII, MS IV, MD VI 2 S new: BS 12, BD 14, MS 4, MD 4	2	3

Time and Place

21.4.2021; 9.00 bis 12.00 Uhr; Zoom

12.05.2021; 9.00 bis 12.00 Uhr; Zoom

26.05.2021; 9.00 bis 12.00 Uhr; Zoom

09.06.2021; 9.00 bis 12.00 Uhr; Zoom

23.06.2021; 9.00 bis 12.00 Uhr; Zoom

07.07.2021; 9.00 bis 12.00 Uhr; Zoom

21.07.2021; 9.00 bis 12.00 Uhr; Zoom

Basically, we plan to conduct the seminar in Zoom. However, we reserve the right to switch to a hybrid or physical presence seminar form at short notice as soon as possible.

Contents of the Seminar

What influence do spectators have on the success of your team? How many doping offenders return to the sport after their suspension? And how does the corona pandemic affect sport?

These and other questions show that interesting stories can be told based on data and new insights beyond stereotypes can result. In this seminar, students of Statistics/Data Science will research, evaluate and present interesting facts about different sports in teams of two with students of Journalism. Among other things, the focus will be on what the data from the world of sport says about society, with a particular focus on “myths in sports”. Students deepen their skills in collecting data (web scraping), interpreting it, communicating clearly with the help of graphics, and gain an insight into data-driven sports journalism.

What do I need to do to get course credits?

Active participation in the seminar. Realization of at least two to three topics within the framework of a publication (the exact scope will be agreed upon with the seminar’s lecturers)
