

There are 5400 players in this study, partitioned into two groups:

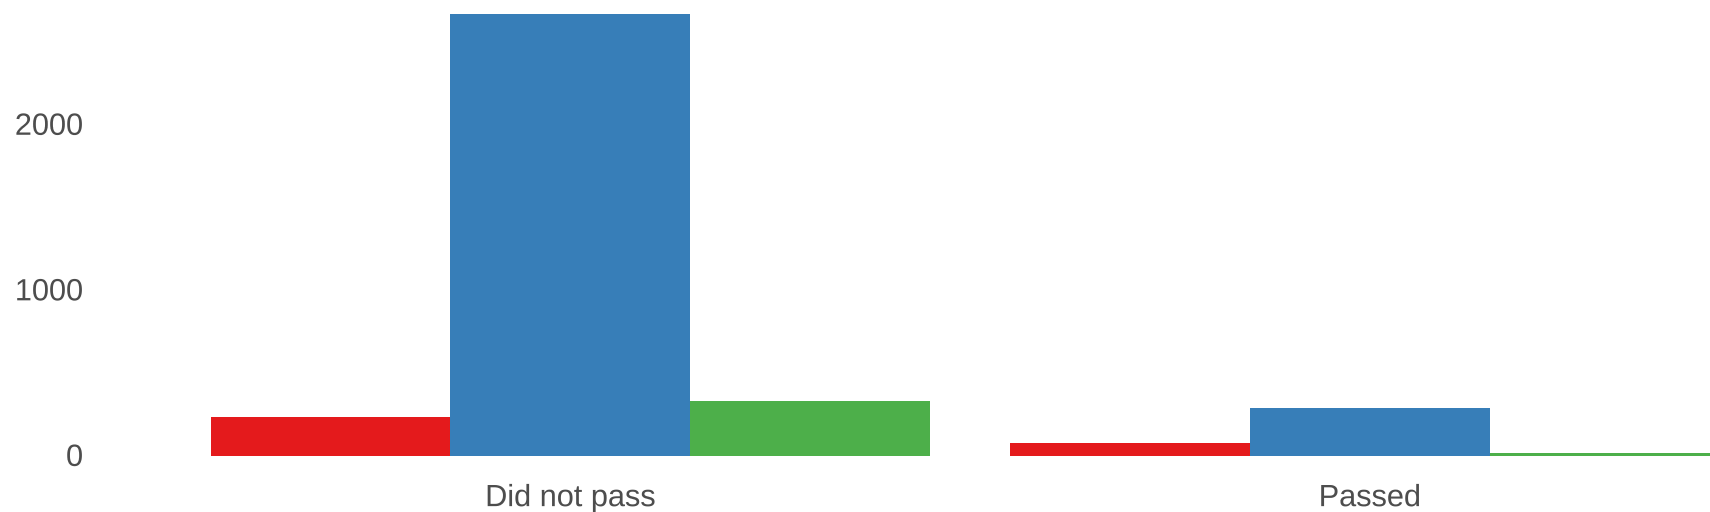

Group 1: 1800 Players that have 10+ years of recorded stats (played from 2007 to 2011):
405 players passed (22.5%) vs 1395 that did not (77.5%).

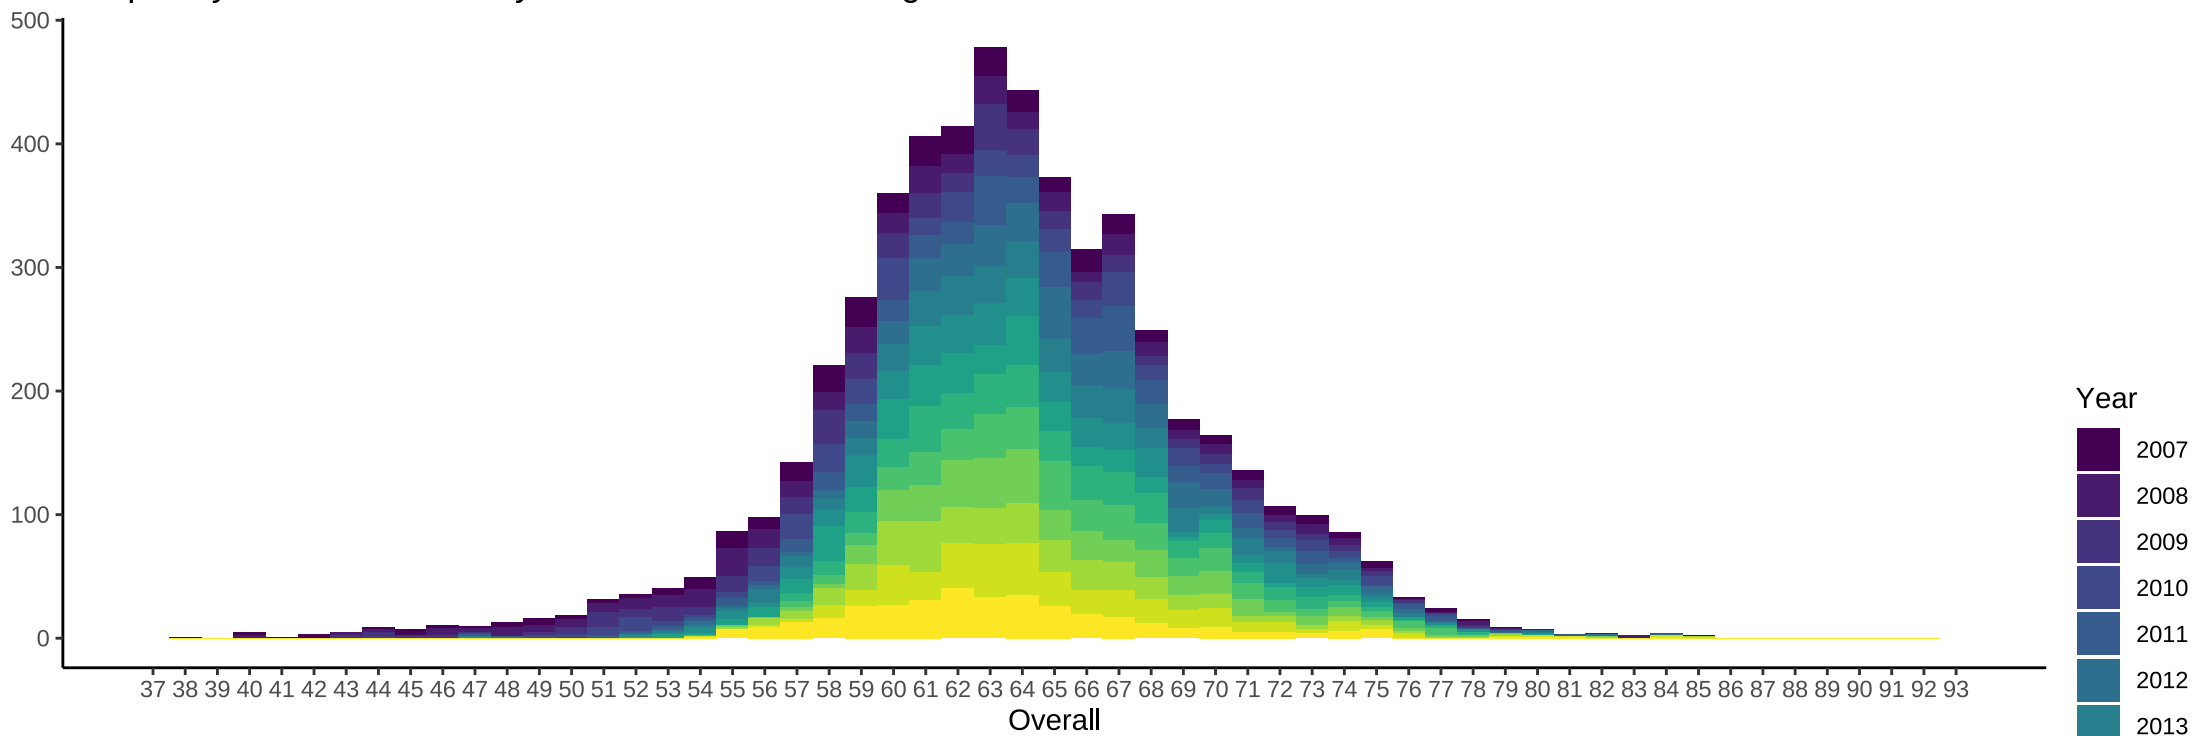

Potential Brackets

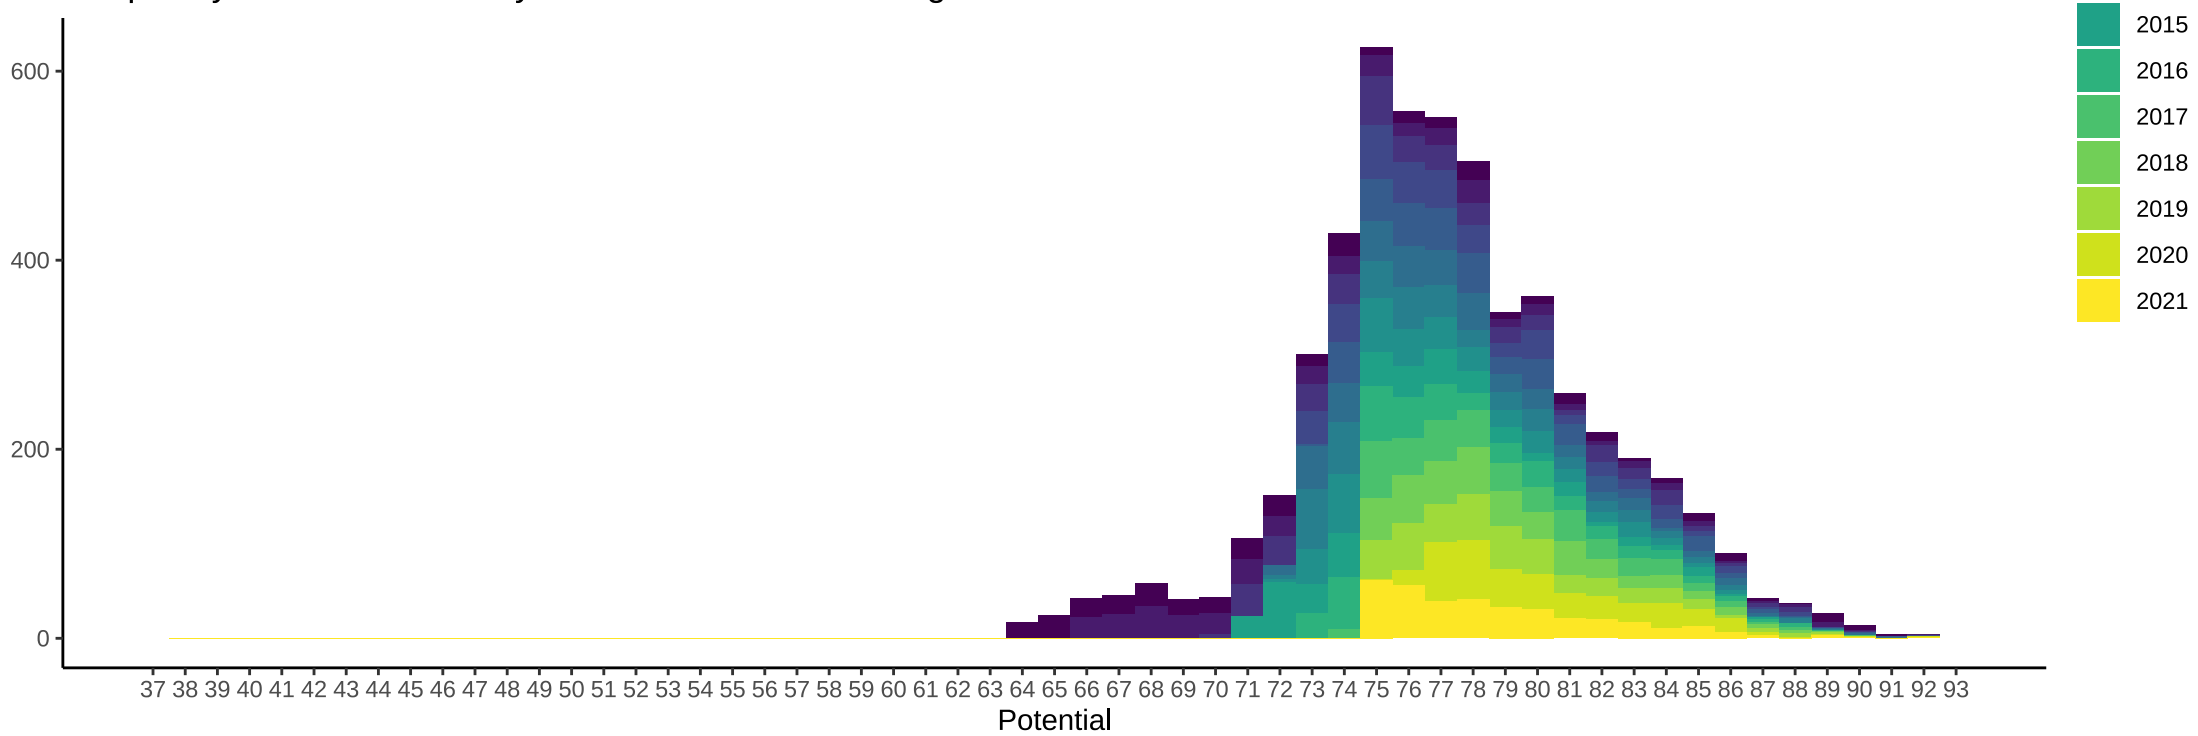

Group 2: 3600 Players that have less than 10 years of recorded stats (played from 2012 to 2021):
376 players passed (10.44%) vs 3224 that did not (89.56%).

Frequency Distribution of Players' Overall Scores at Age 19

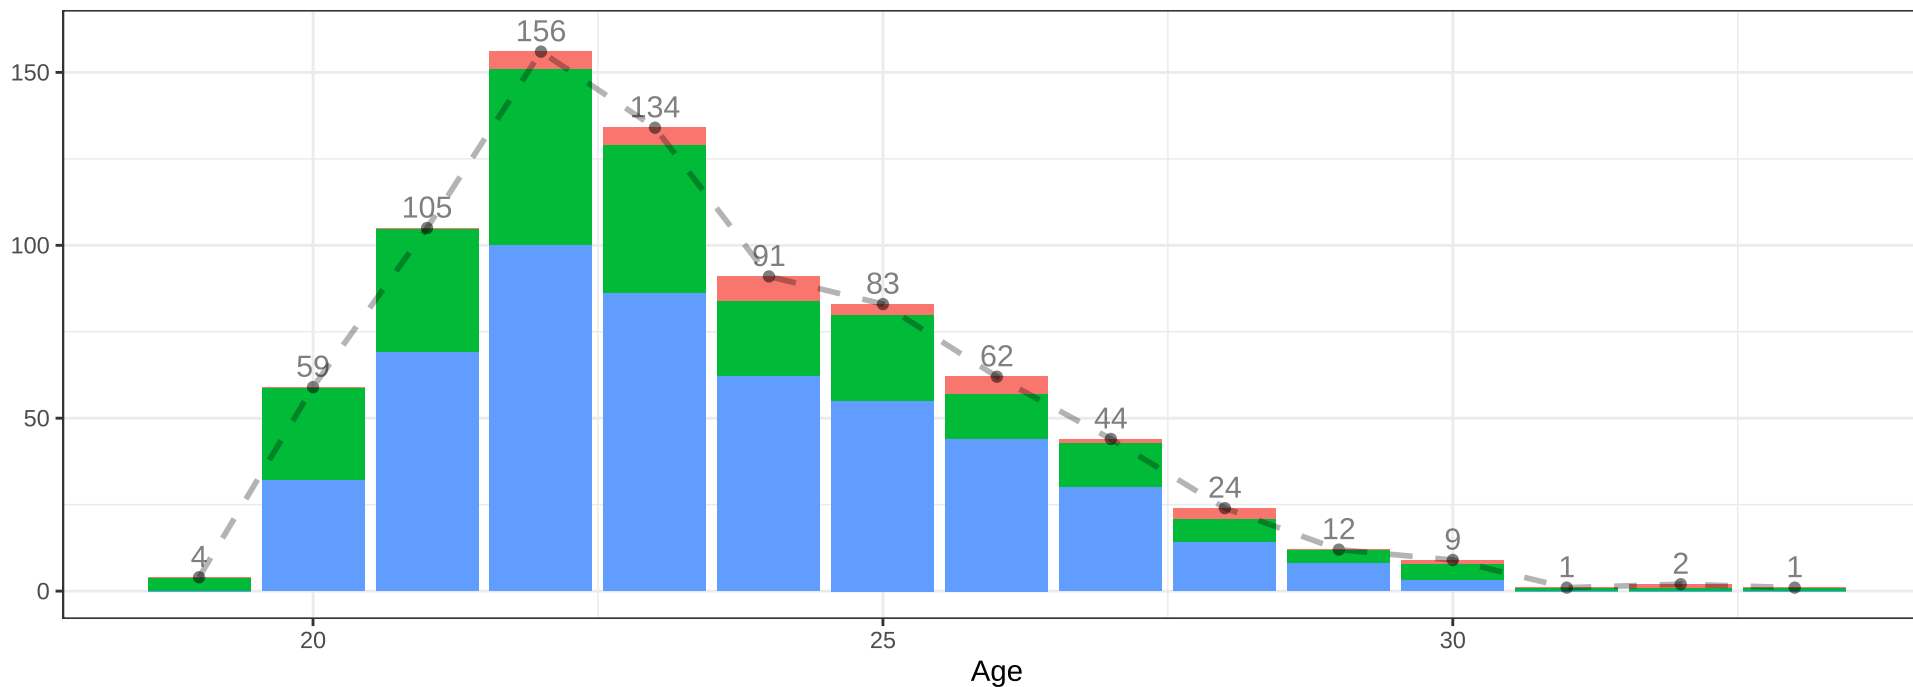

Frequency Distribution of Players' Potential Scores at Age 19

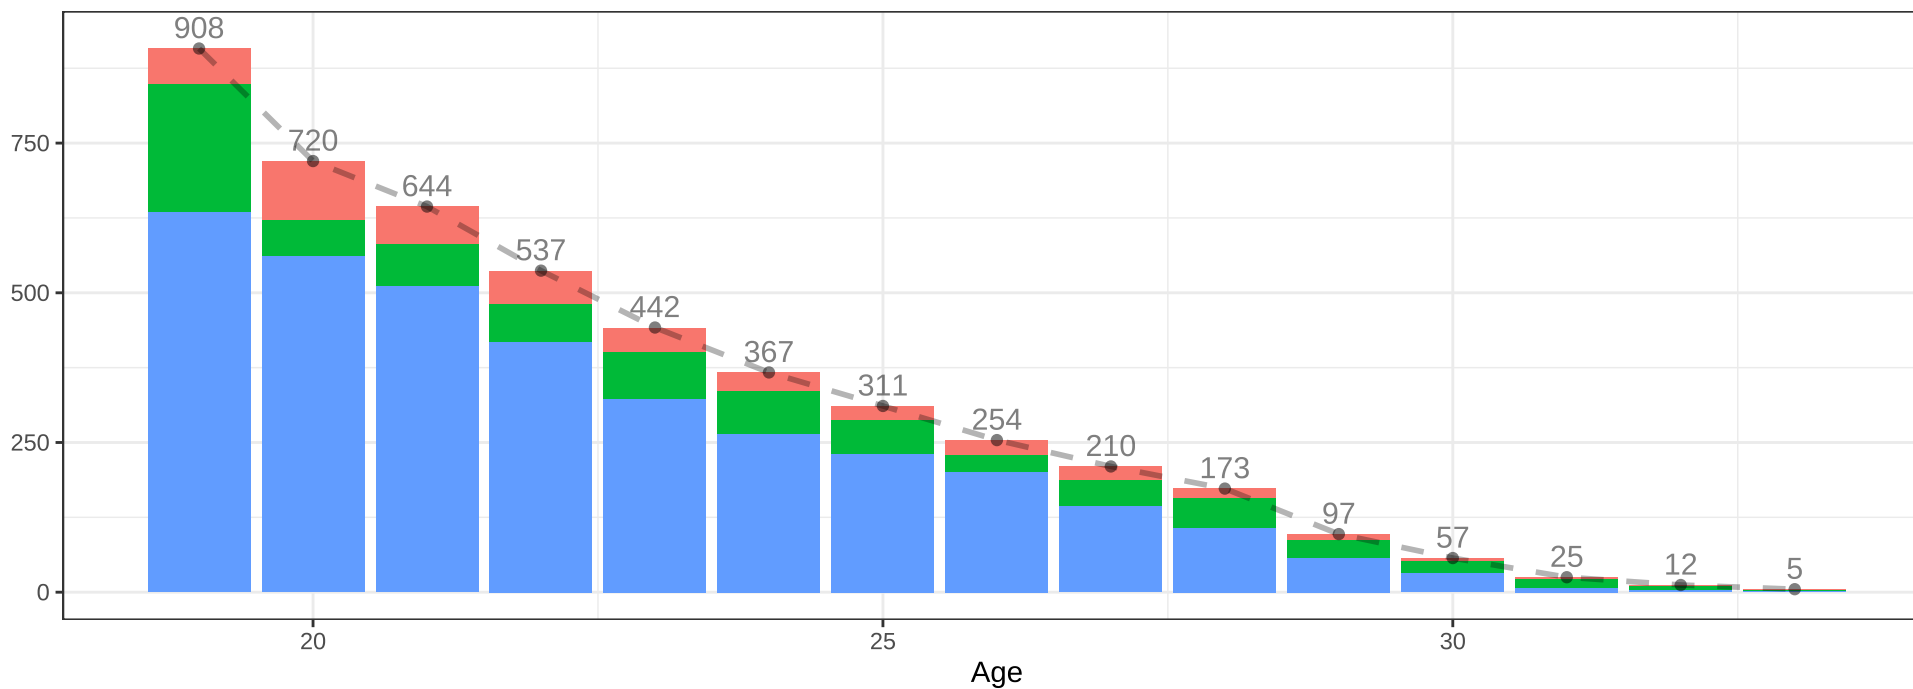

At which age are players reaching their potential?

781 players reached their FIFA potential (of age 19) in the following age distribution.

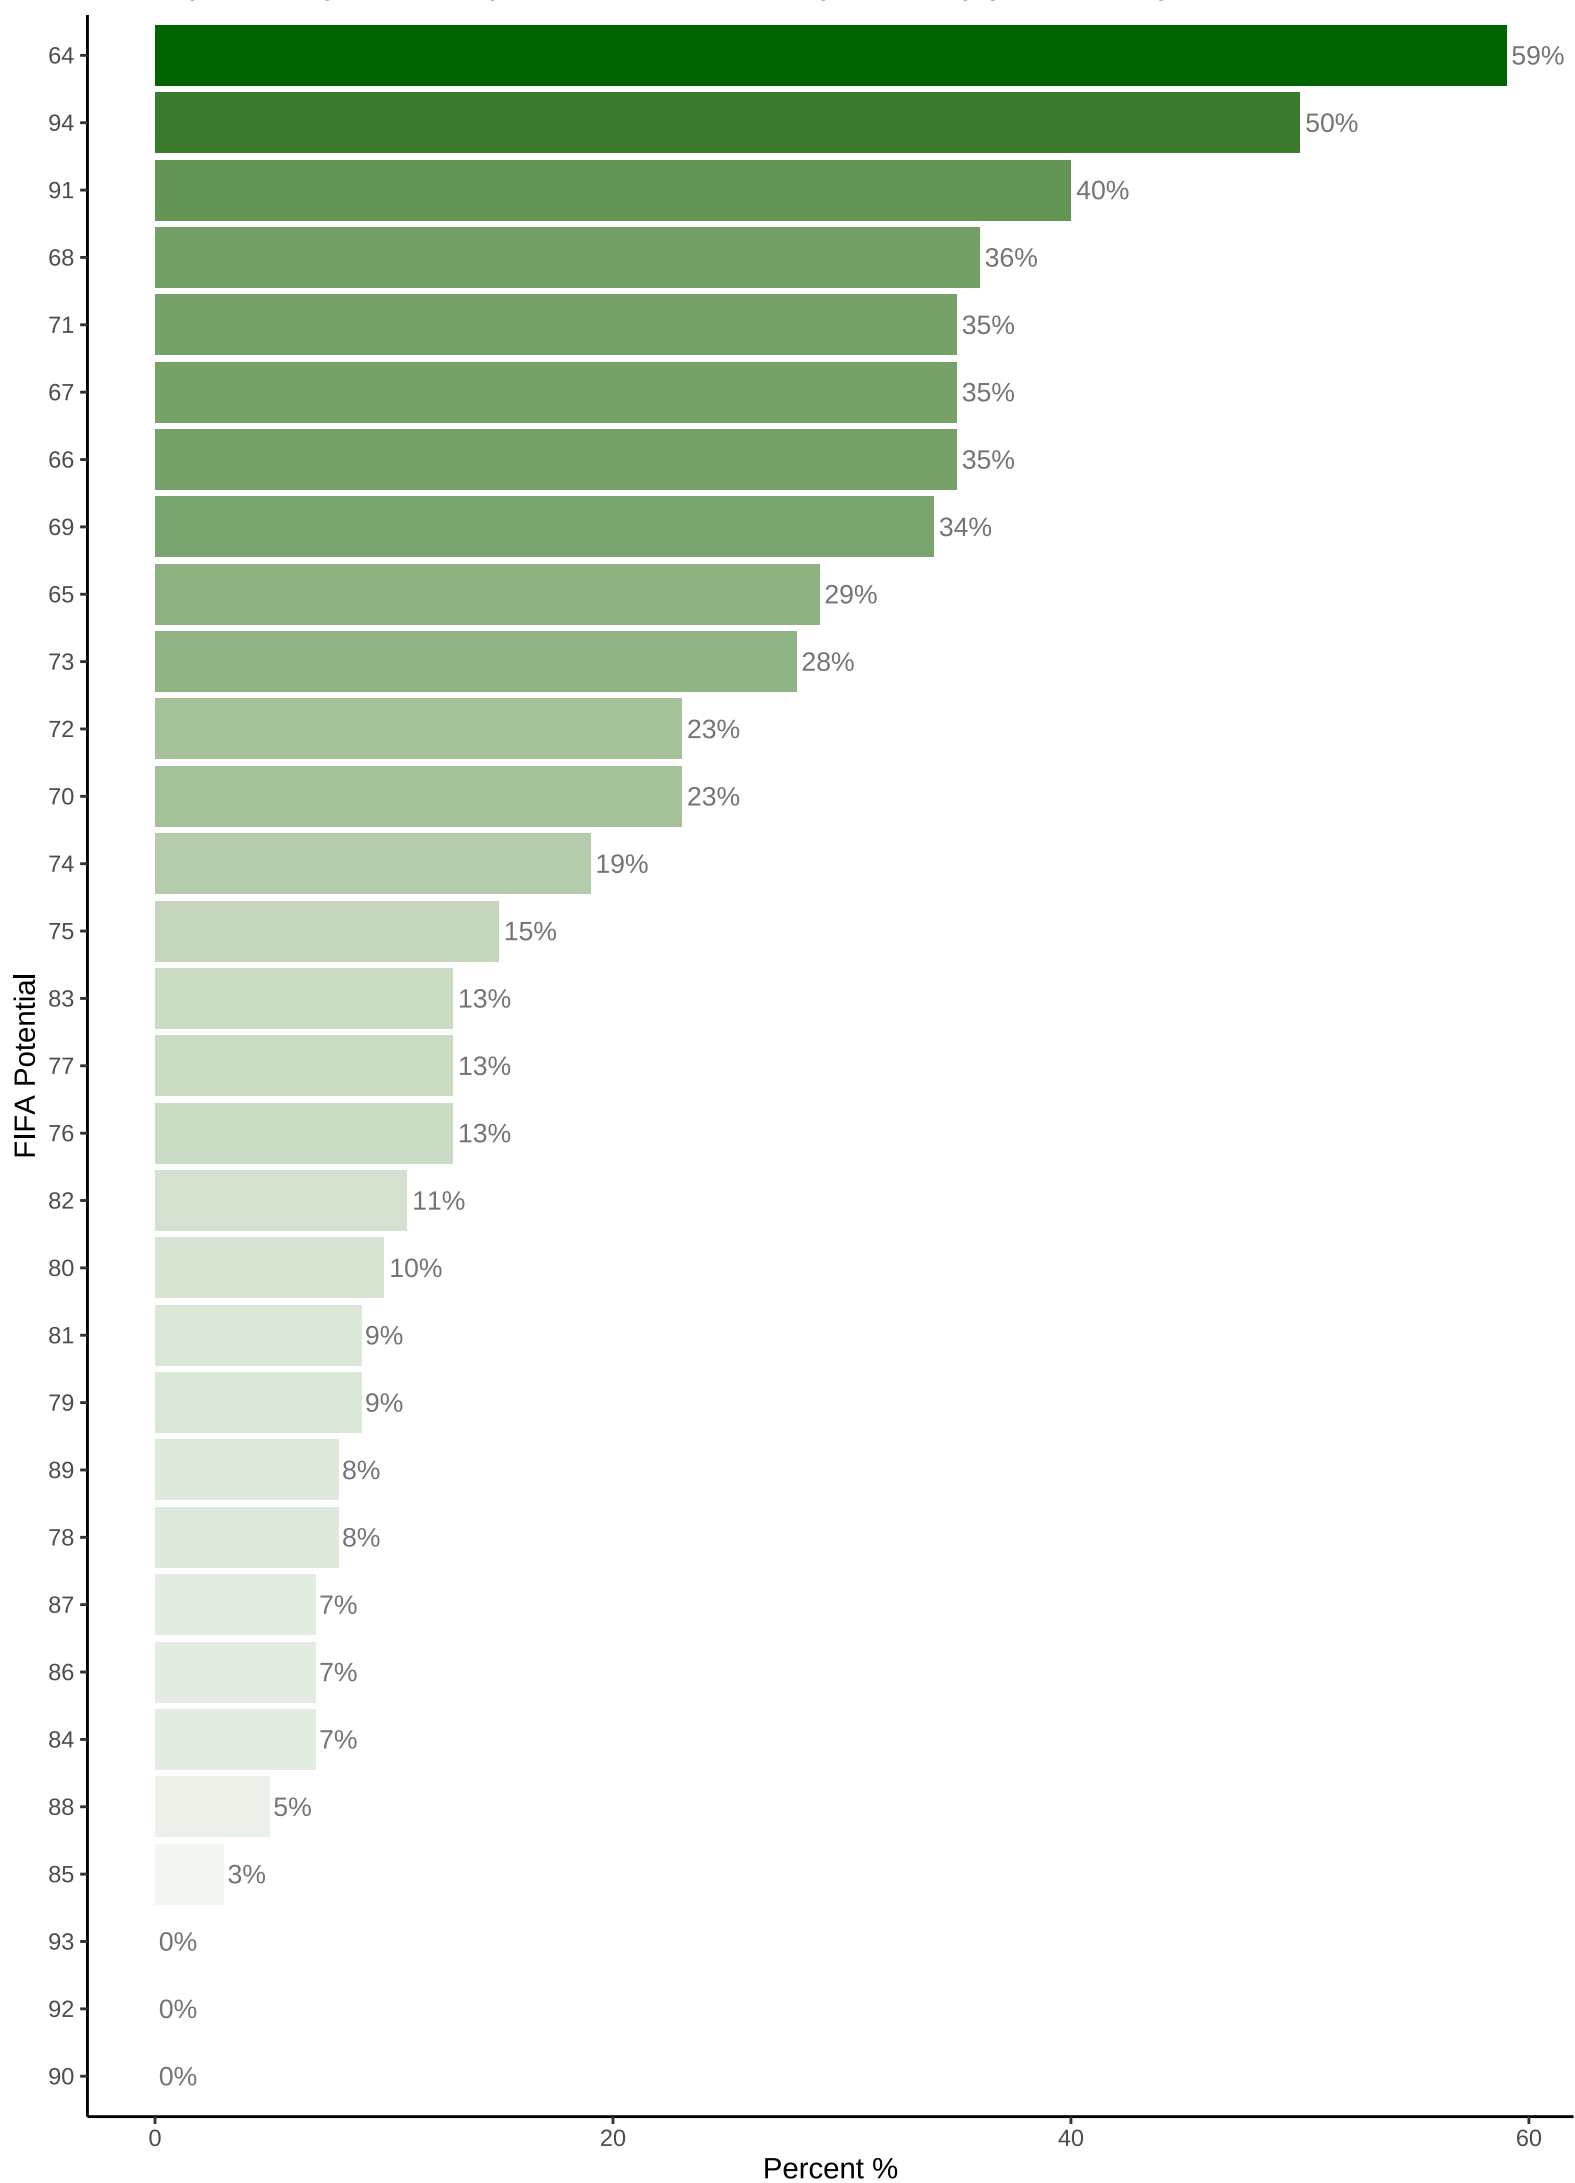

At which age are players reaching their prime?

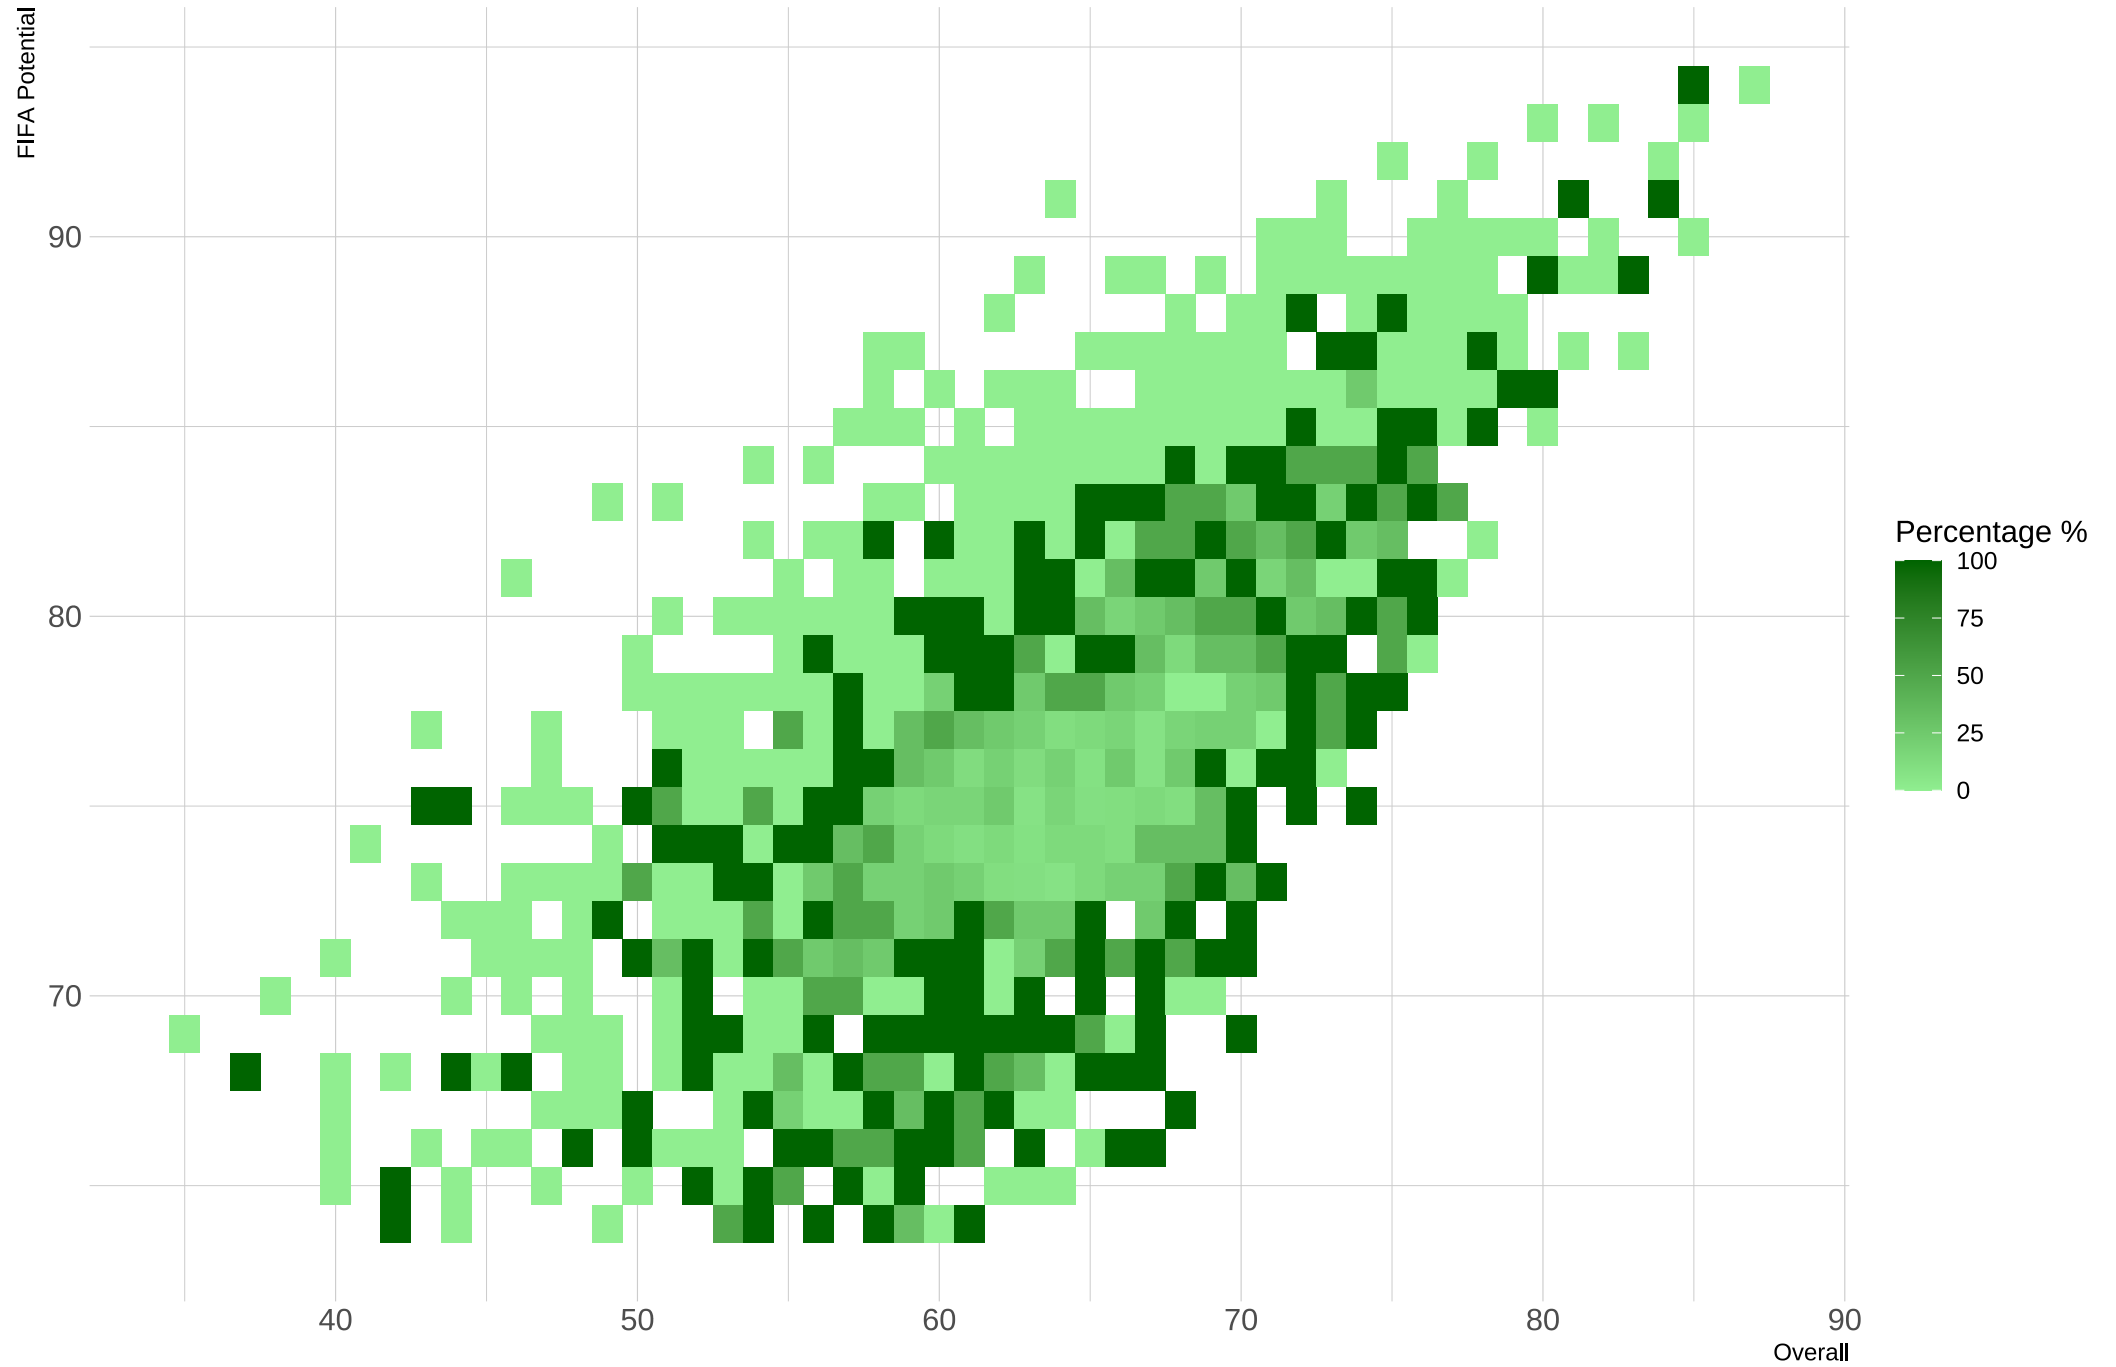

4762 players reached their prime in the following age distribution.

Given you had your FIFA potential, what is the probability you actually reach it?

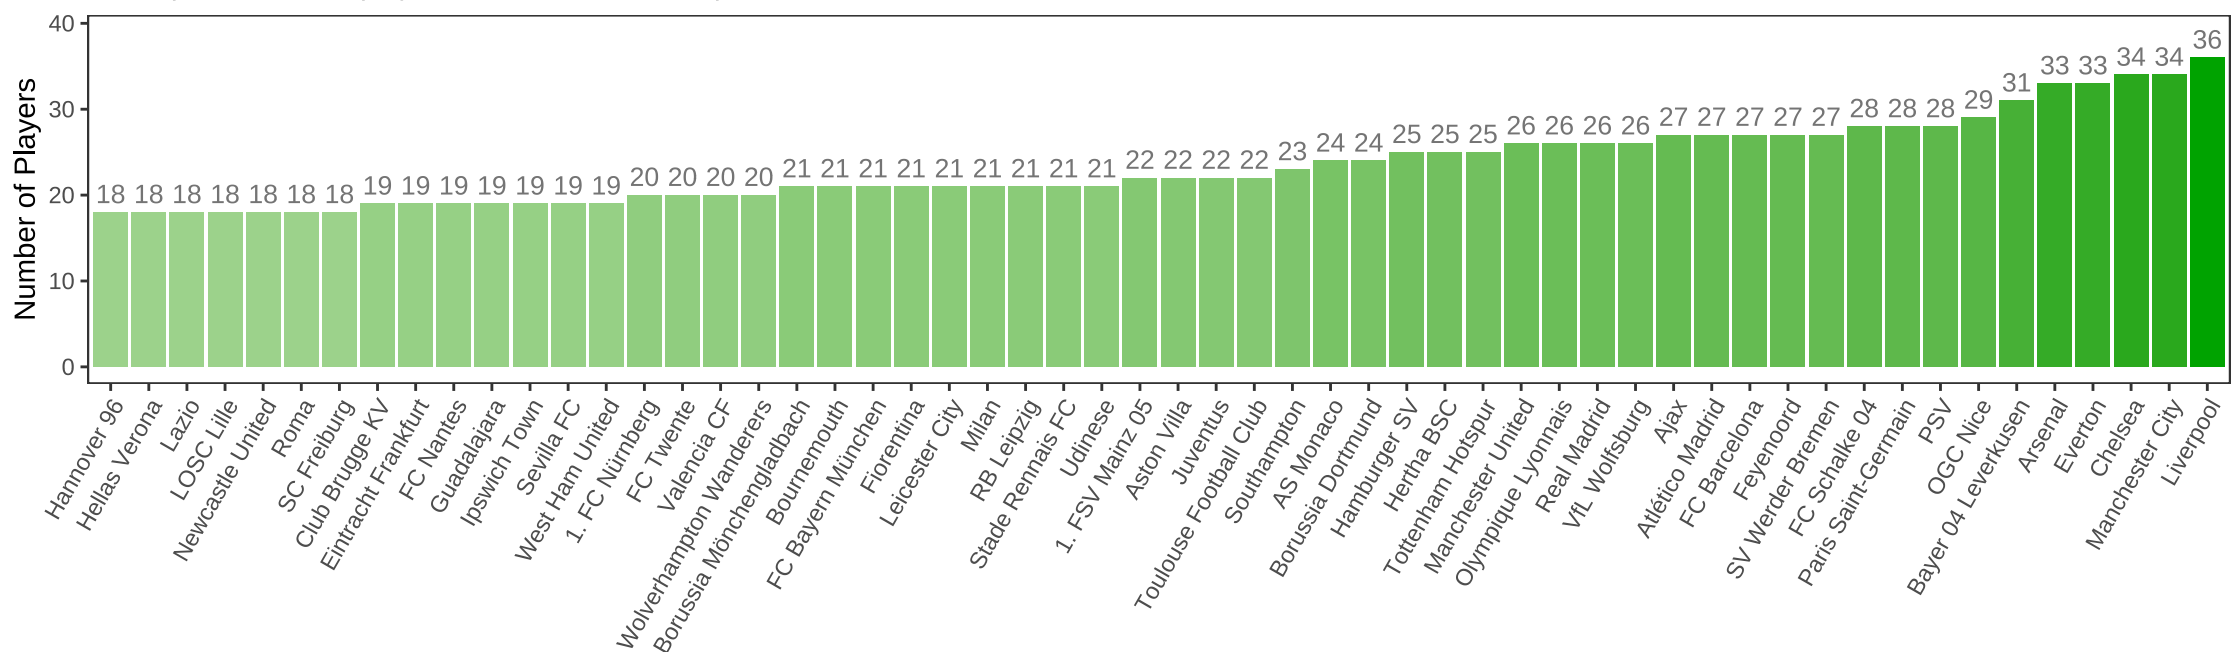

Given your Fifa potential and overall score, what is the probability of reaching it?

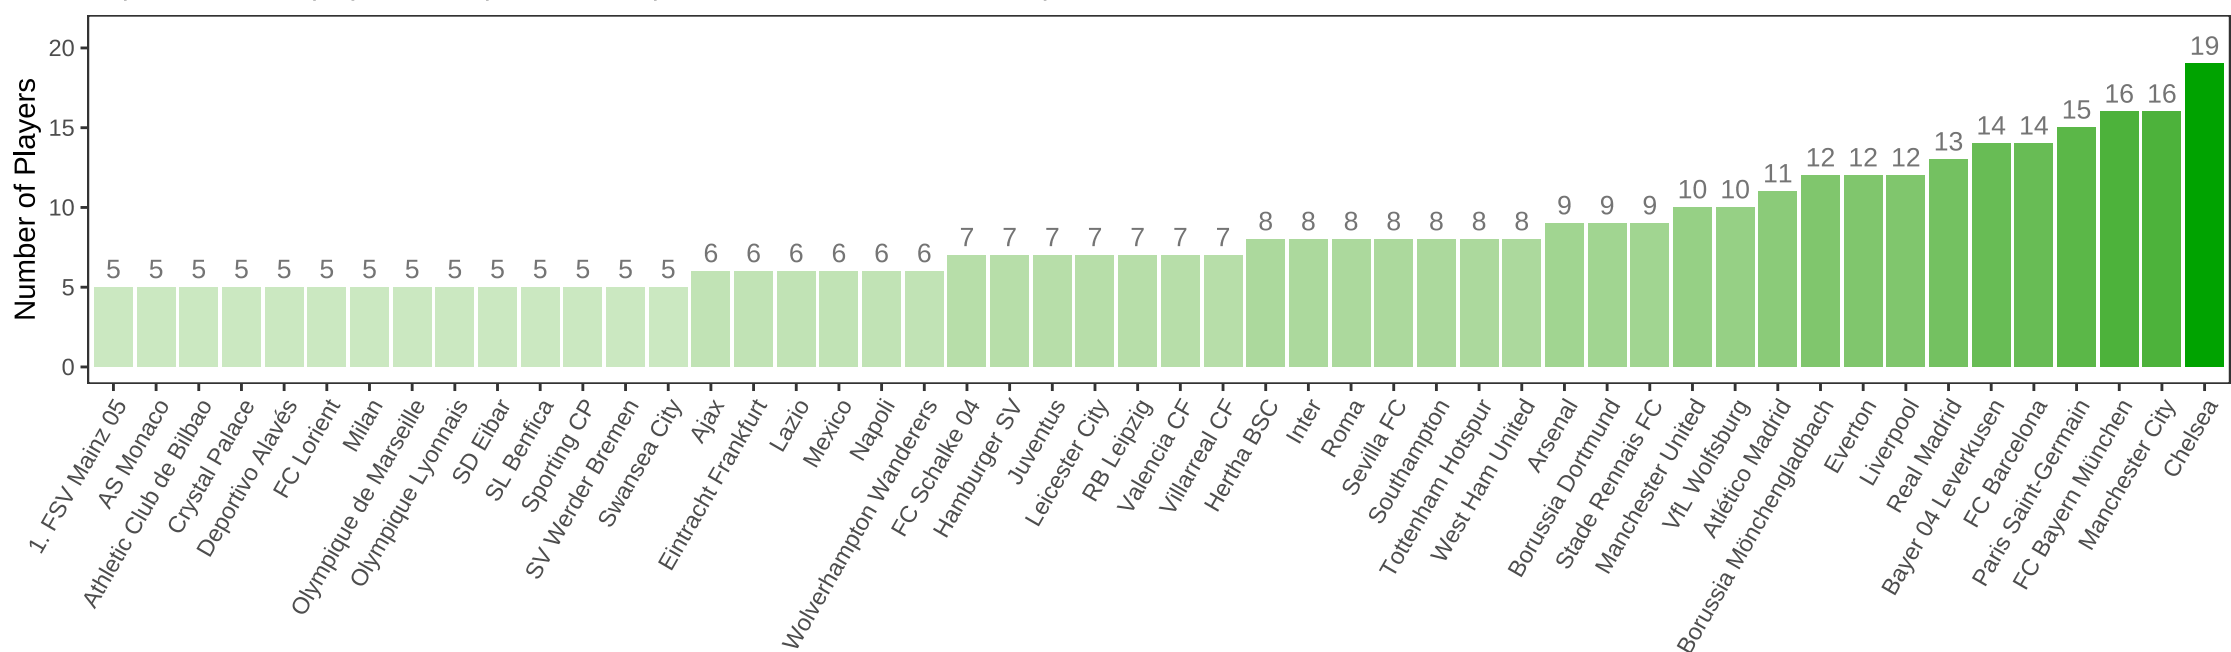

Clubs Distribution of Players' Prime

The top clubs where players have reached their prime in.

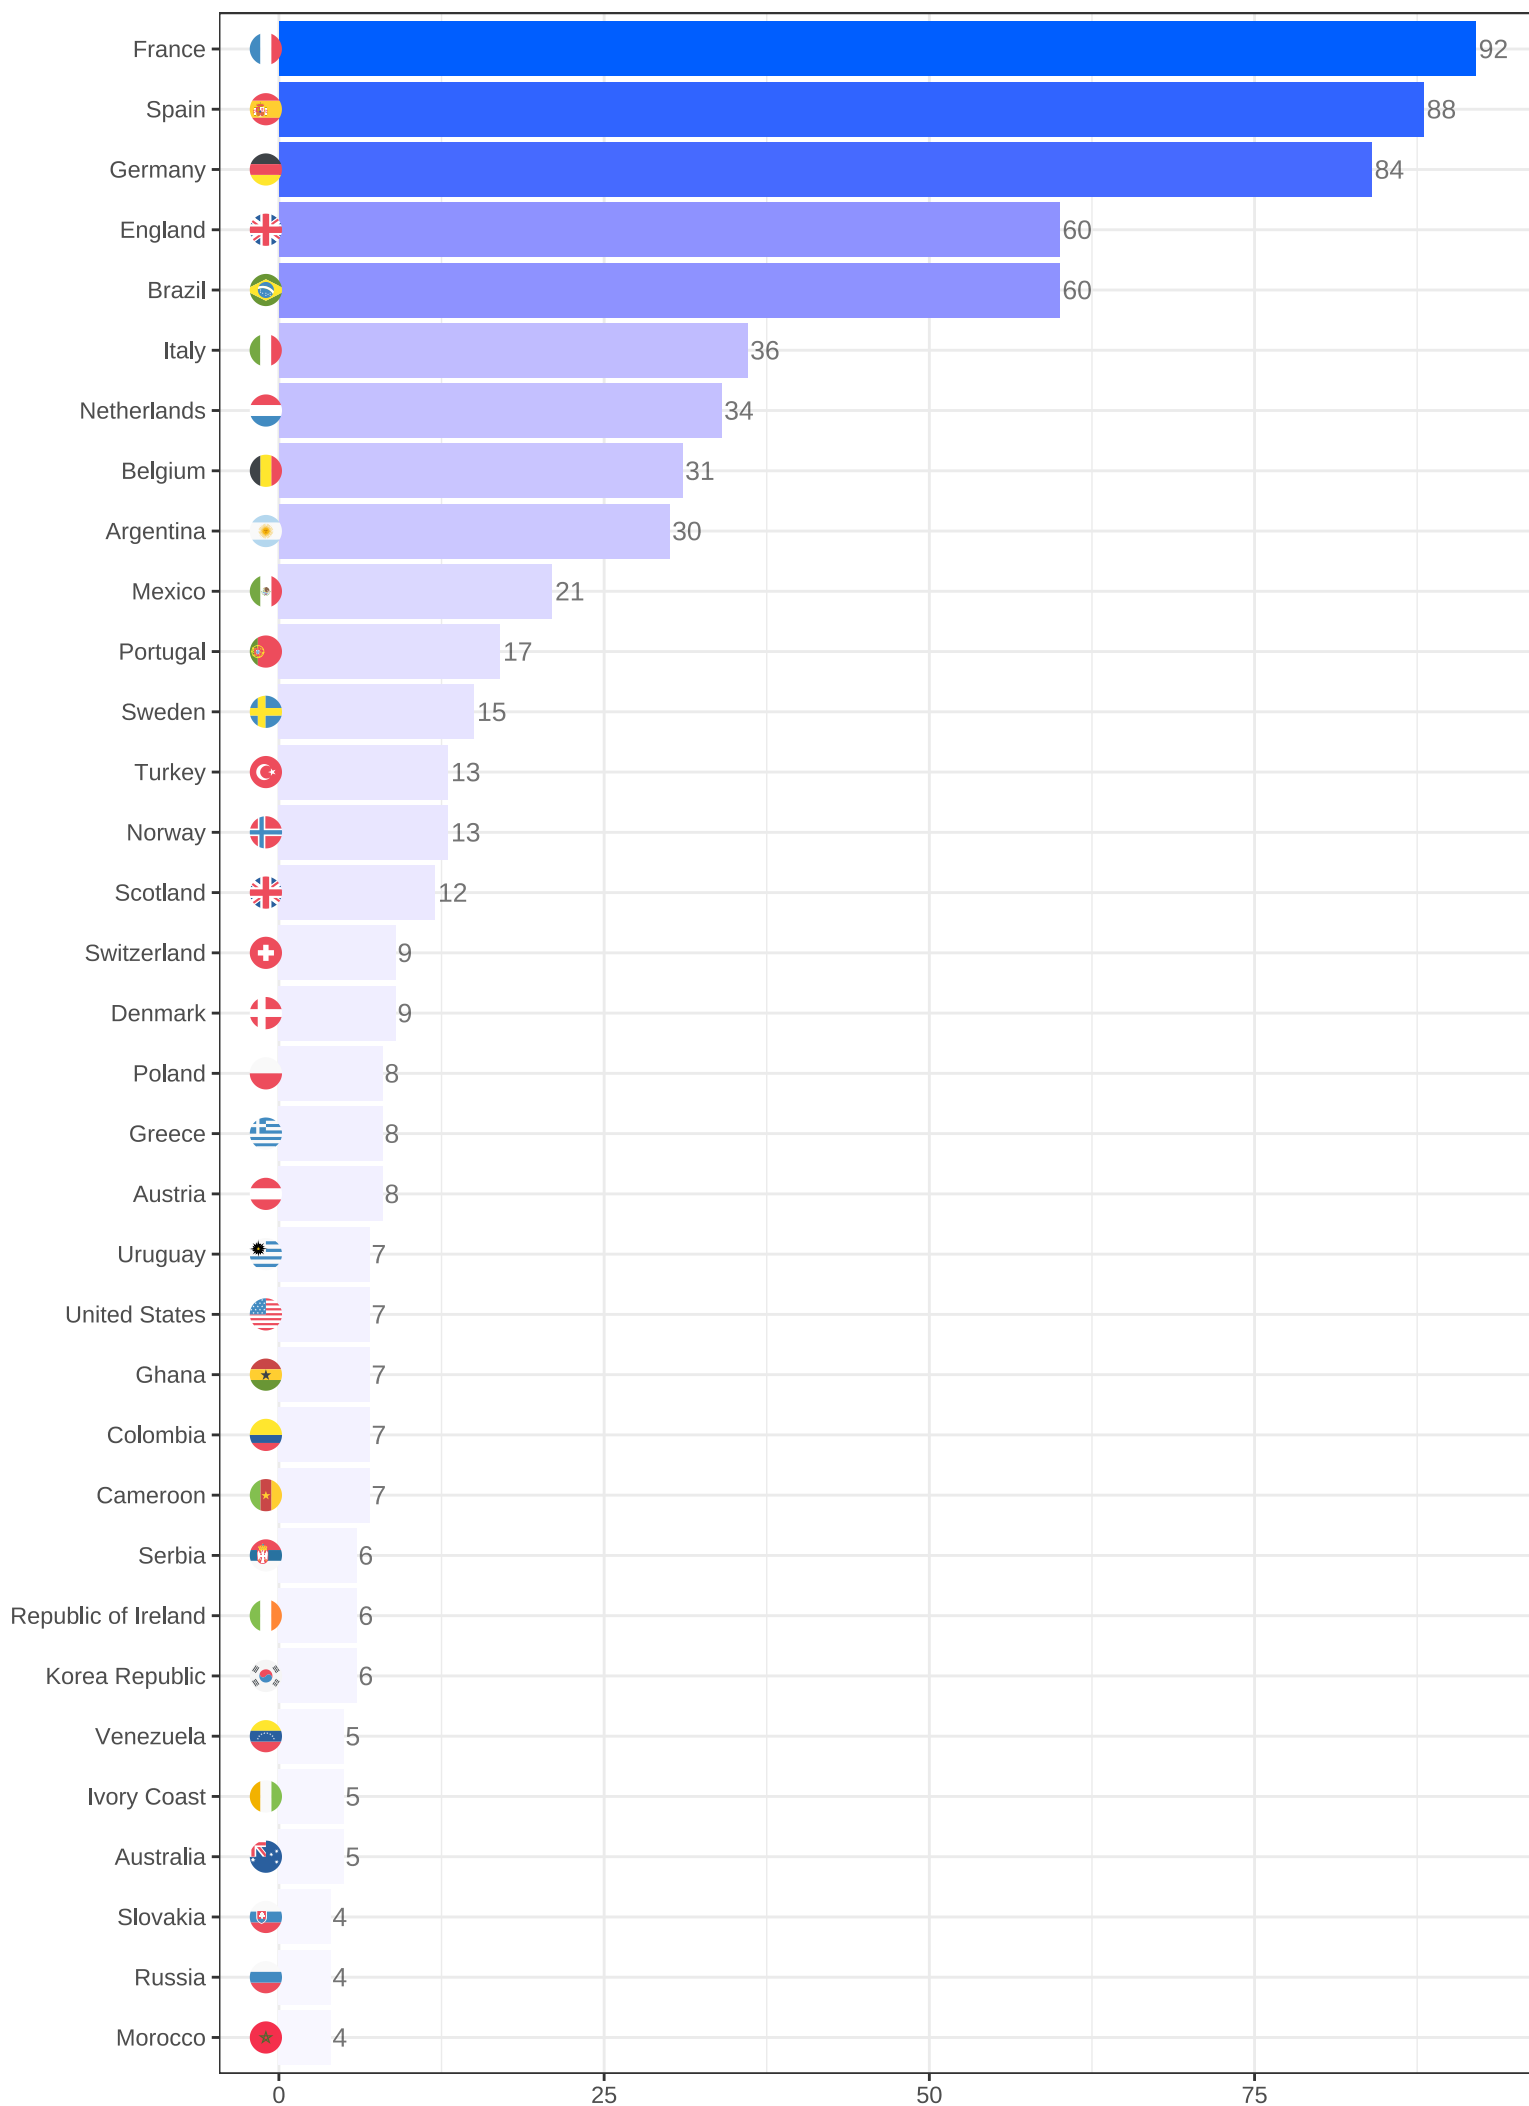

Top clubs where players, who passed their potential, have achieved their prime in.

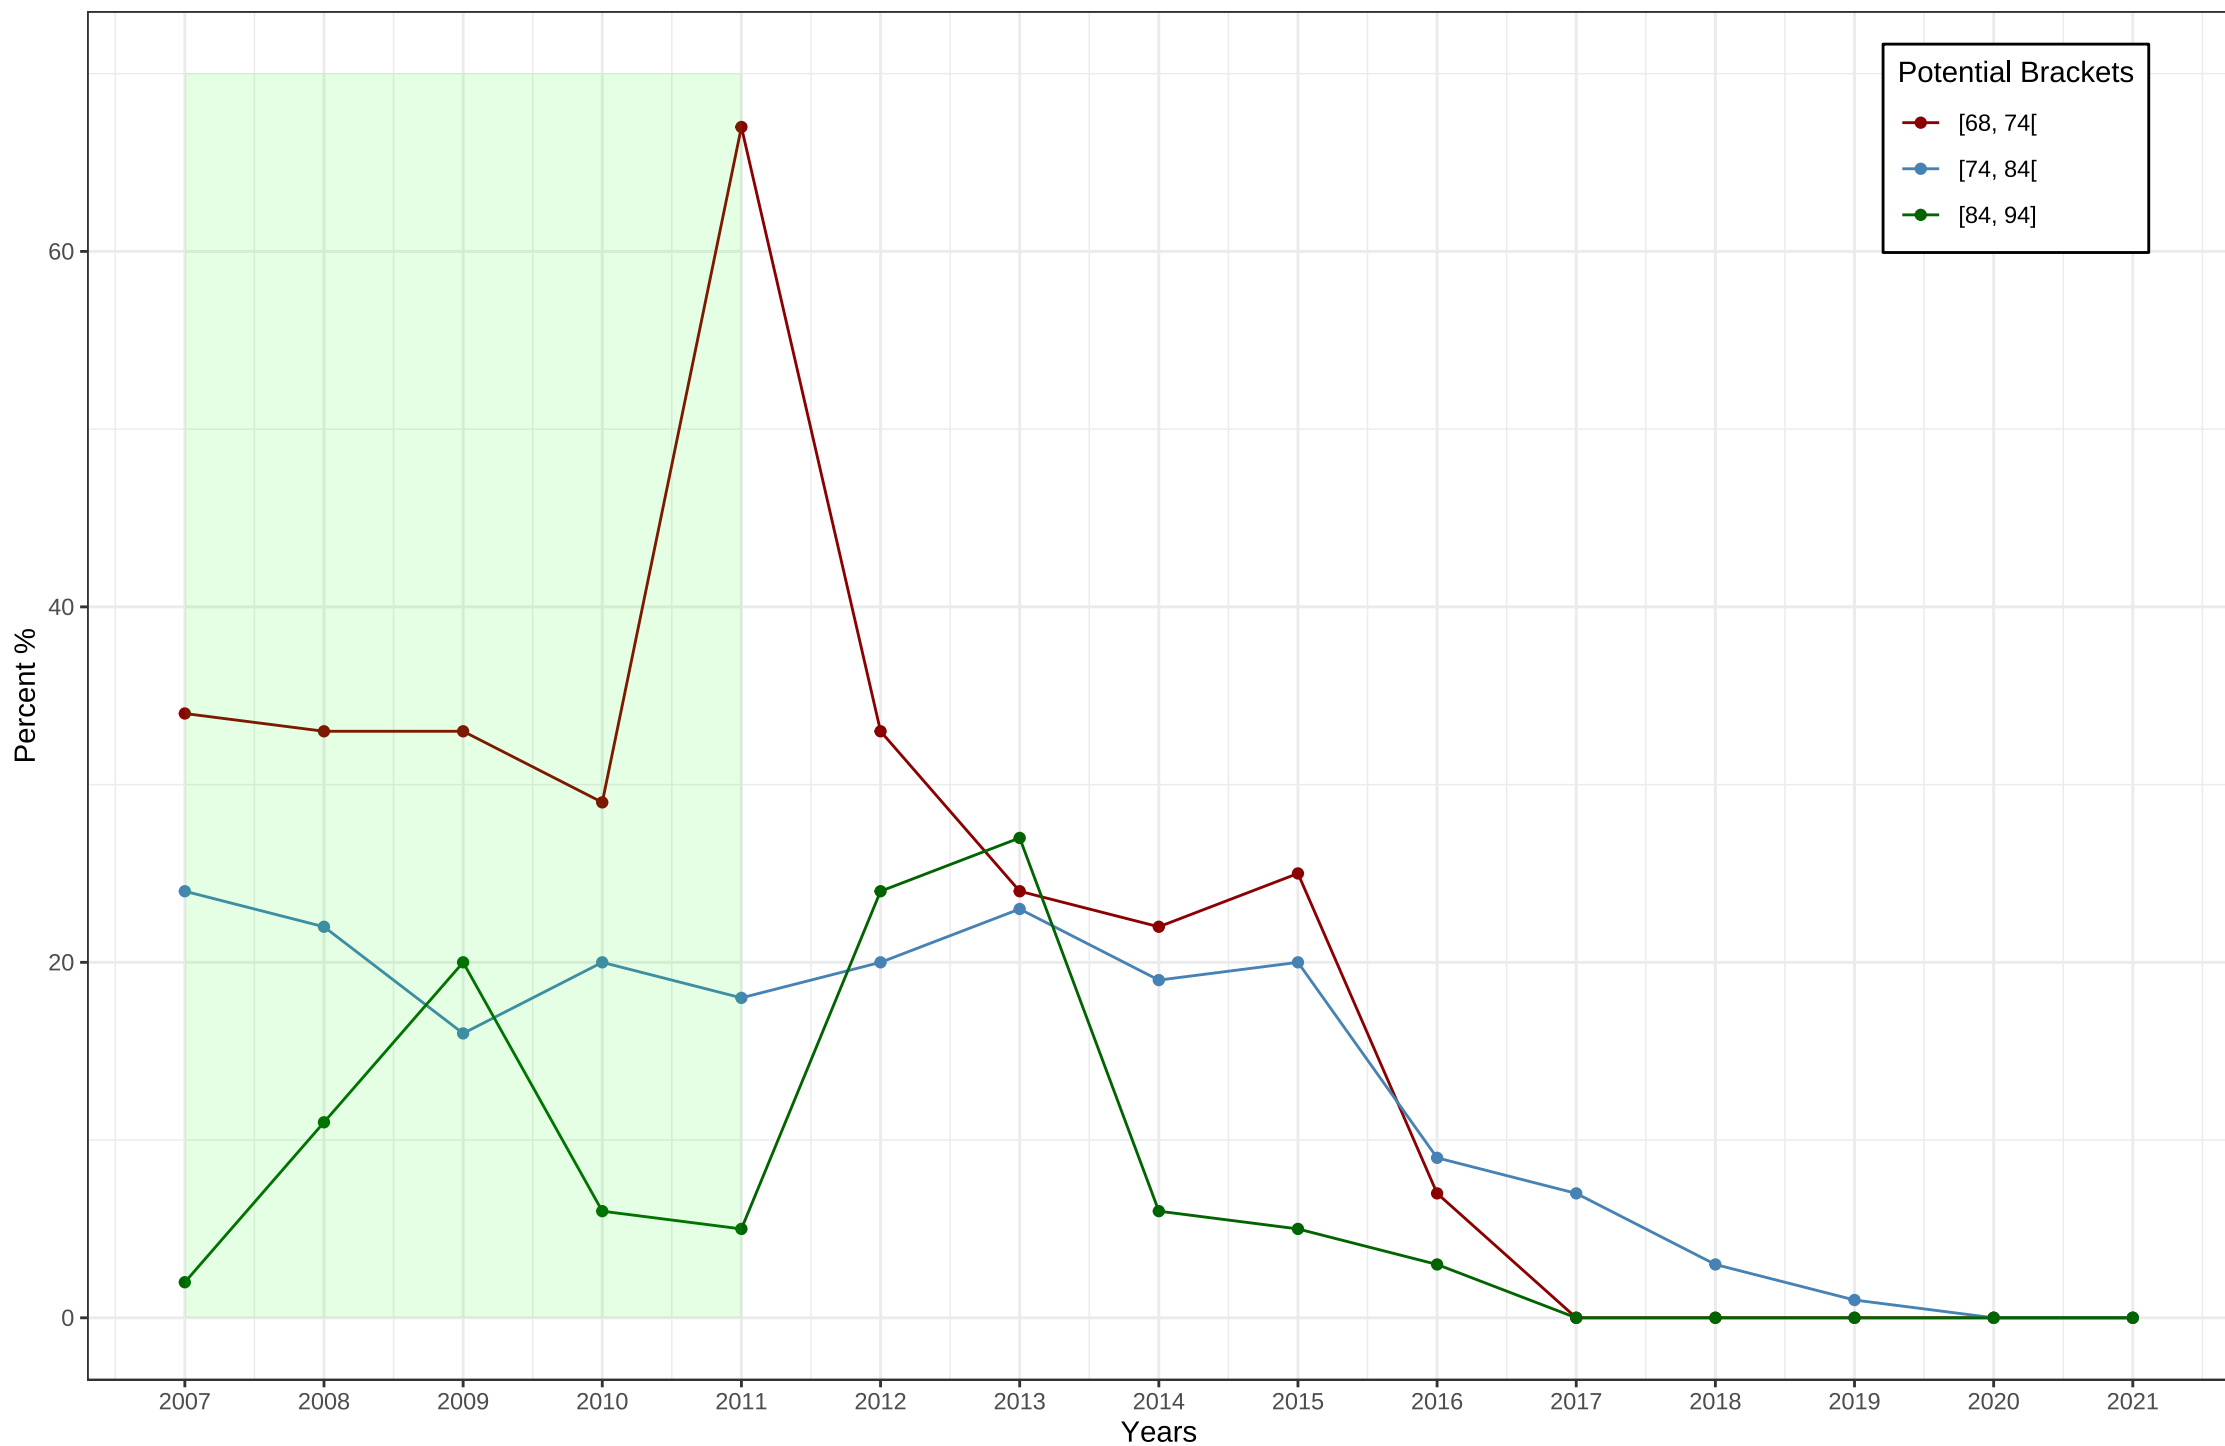

Nationalities of Our Overachievers

781 out of 5400 players reached their potential. This plot takes a look at the countries with the highest

Is FIFA's Accuracy Consistent?

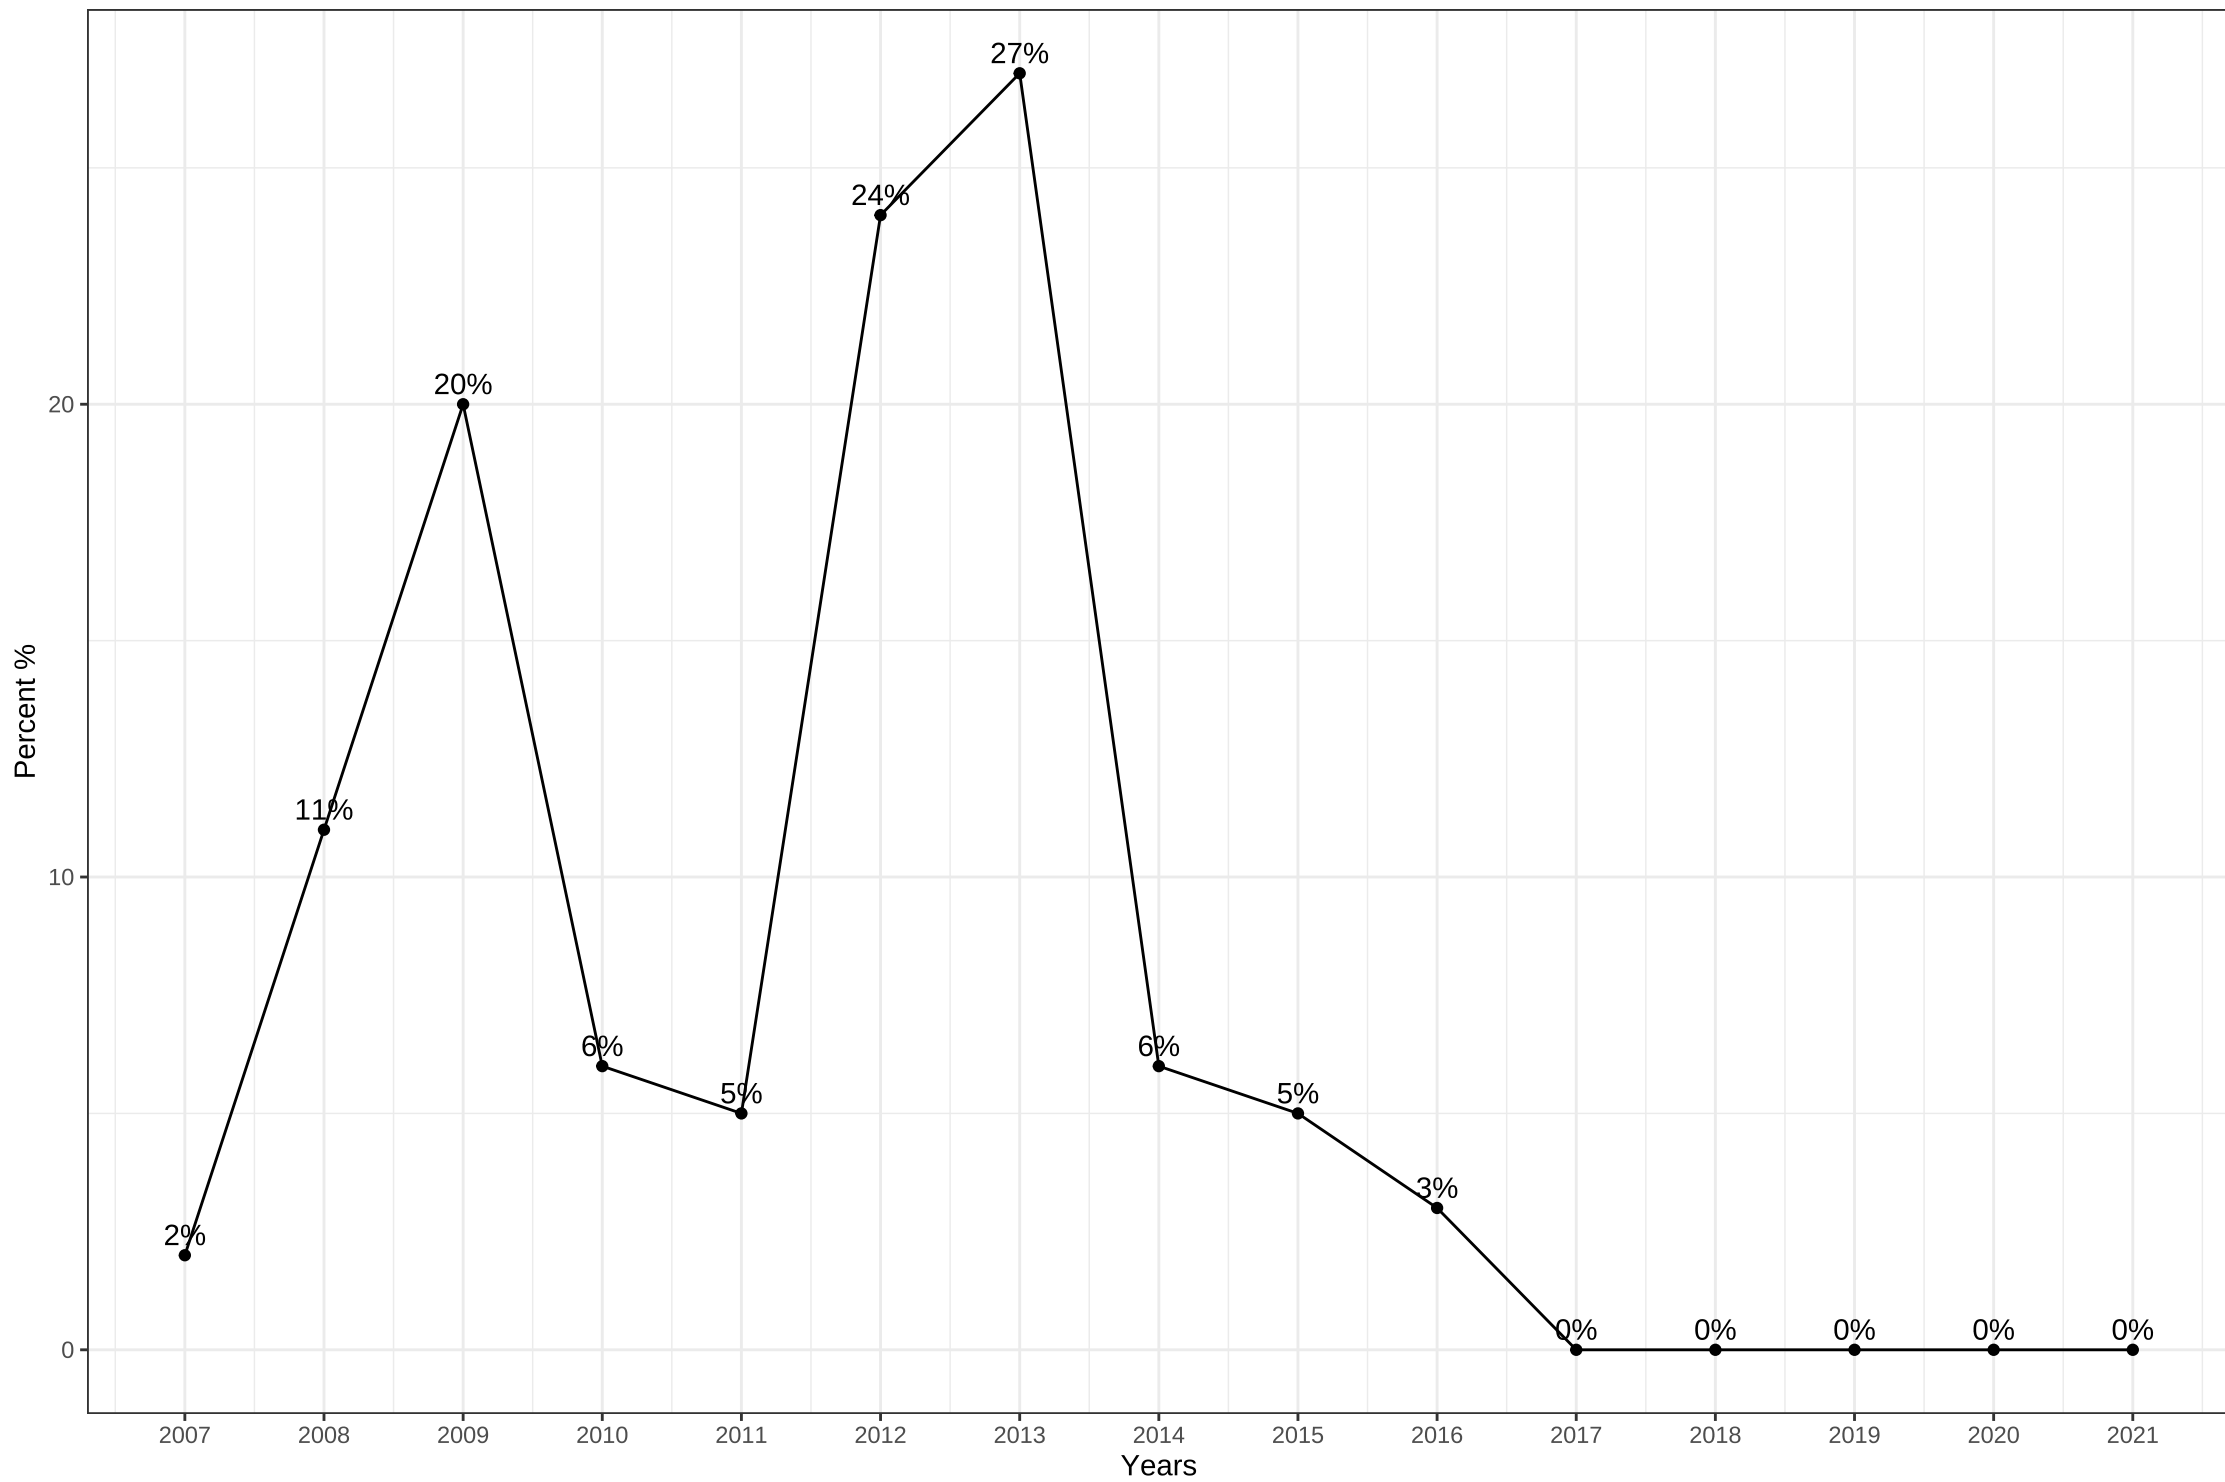

Percent of correct predictions depending on the potential brackets of the players*.

Players from the years 2007-2011 (green background) have had 10 years, or more, of recorded overall.

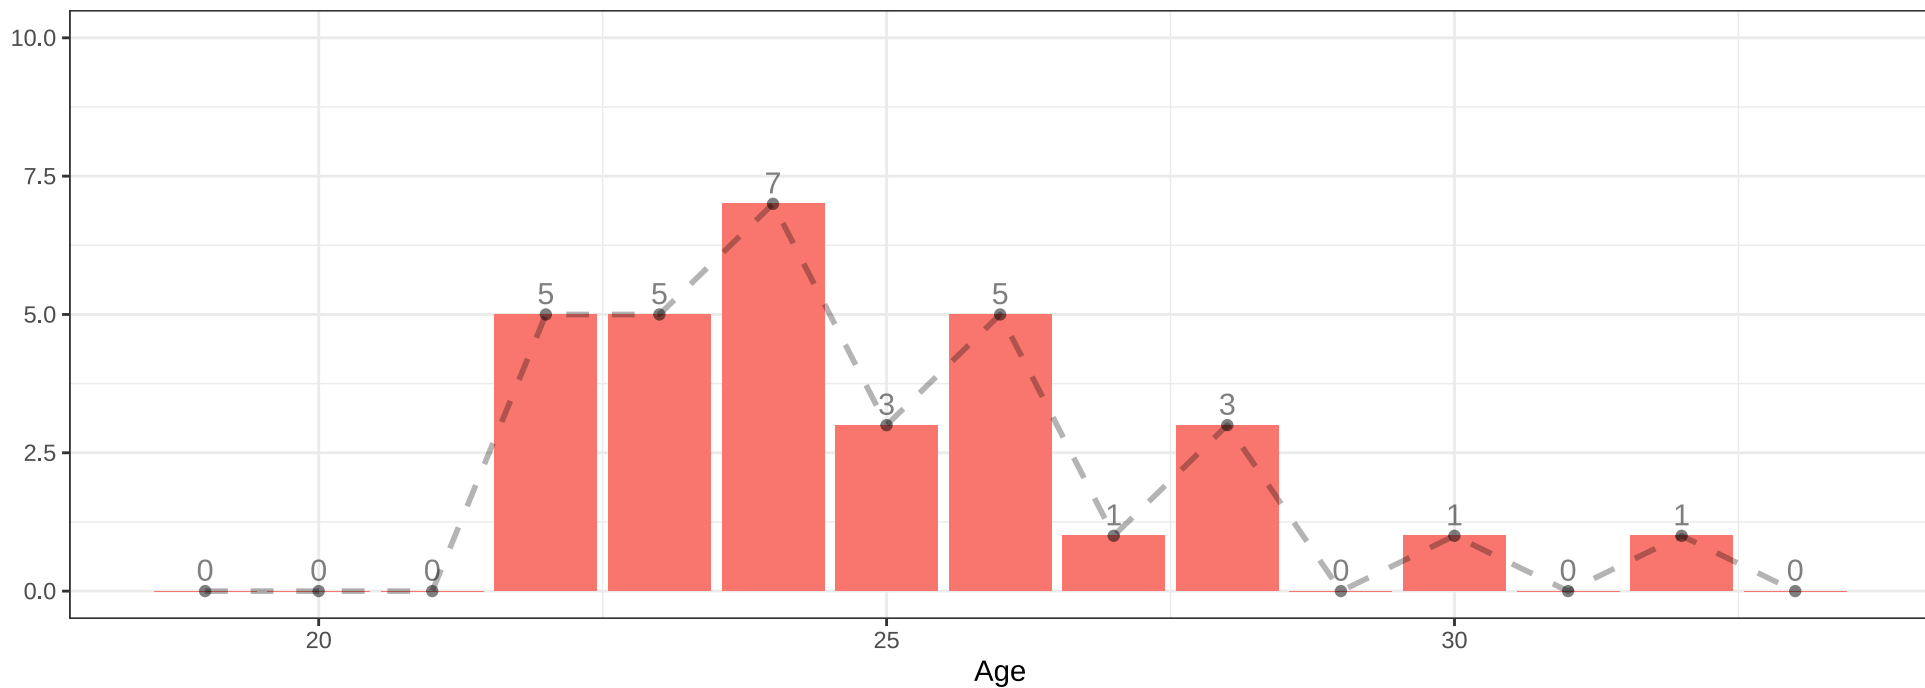

EA FIFA's Accuracy For Future Stars

Percent of correct predictions of the [84, 94] potential bracket.

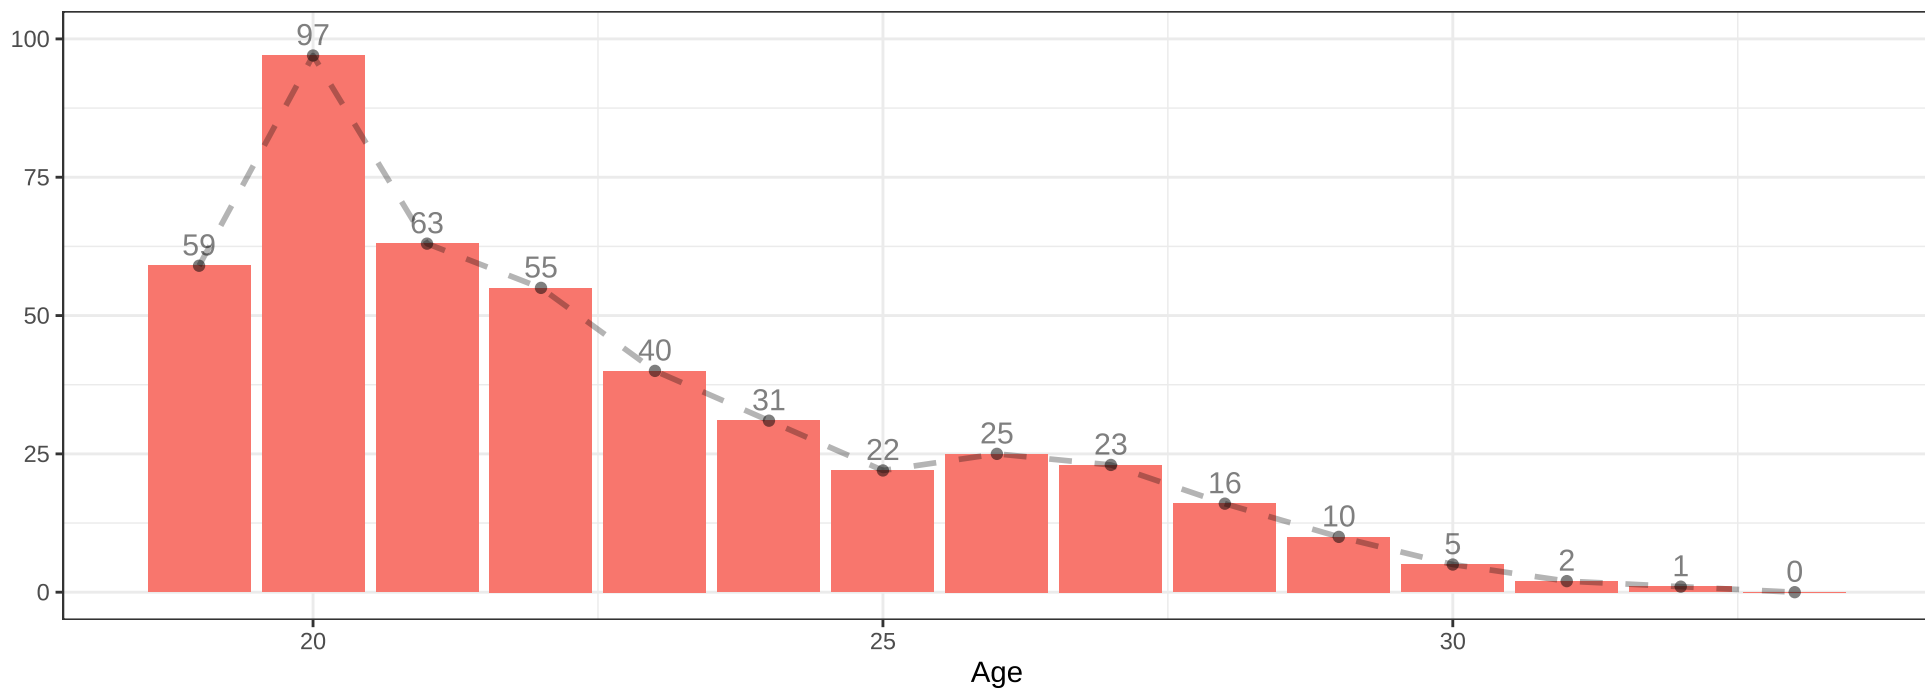

At which age are players reaching their potential?

31 players of the [84, 94] potential bracket reached their FIFA potential (of age 19) in the following age distribution.

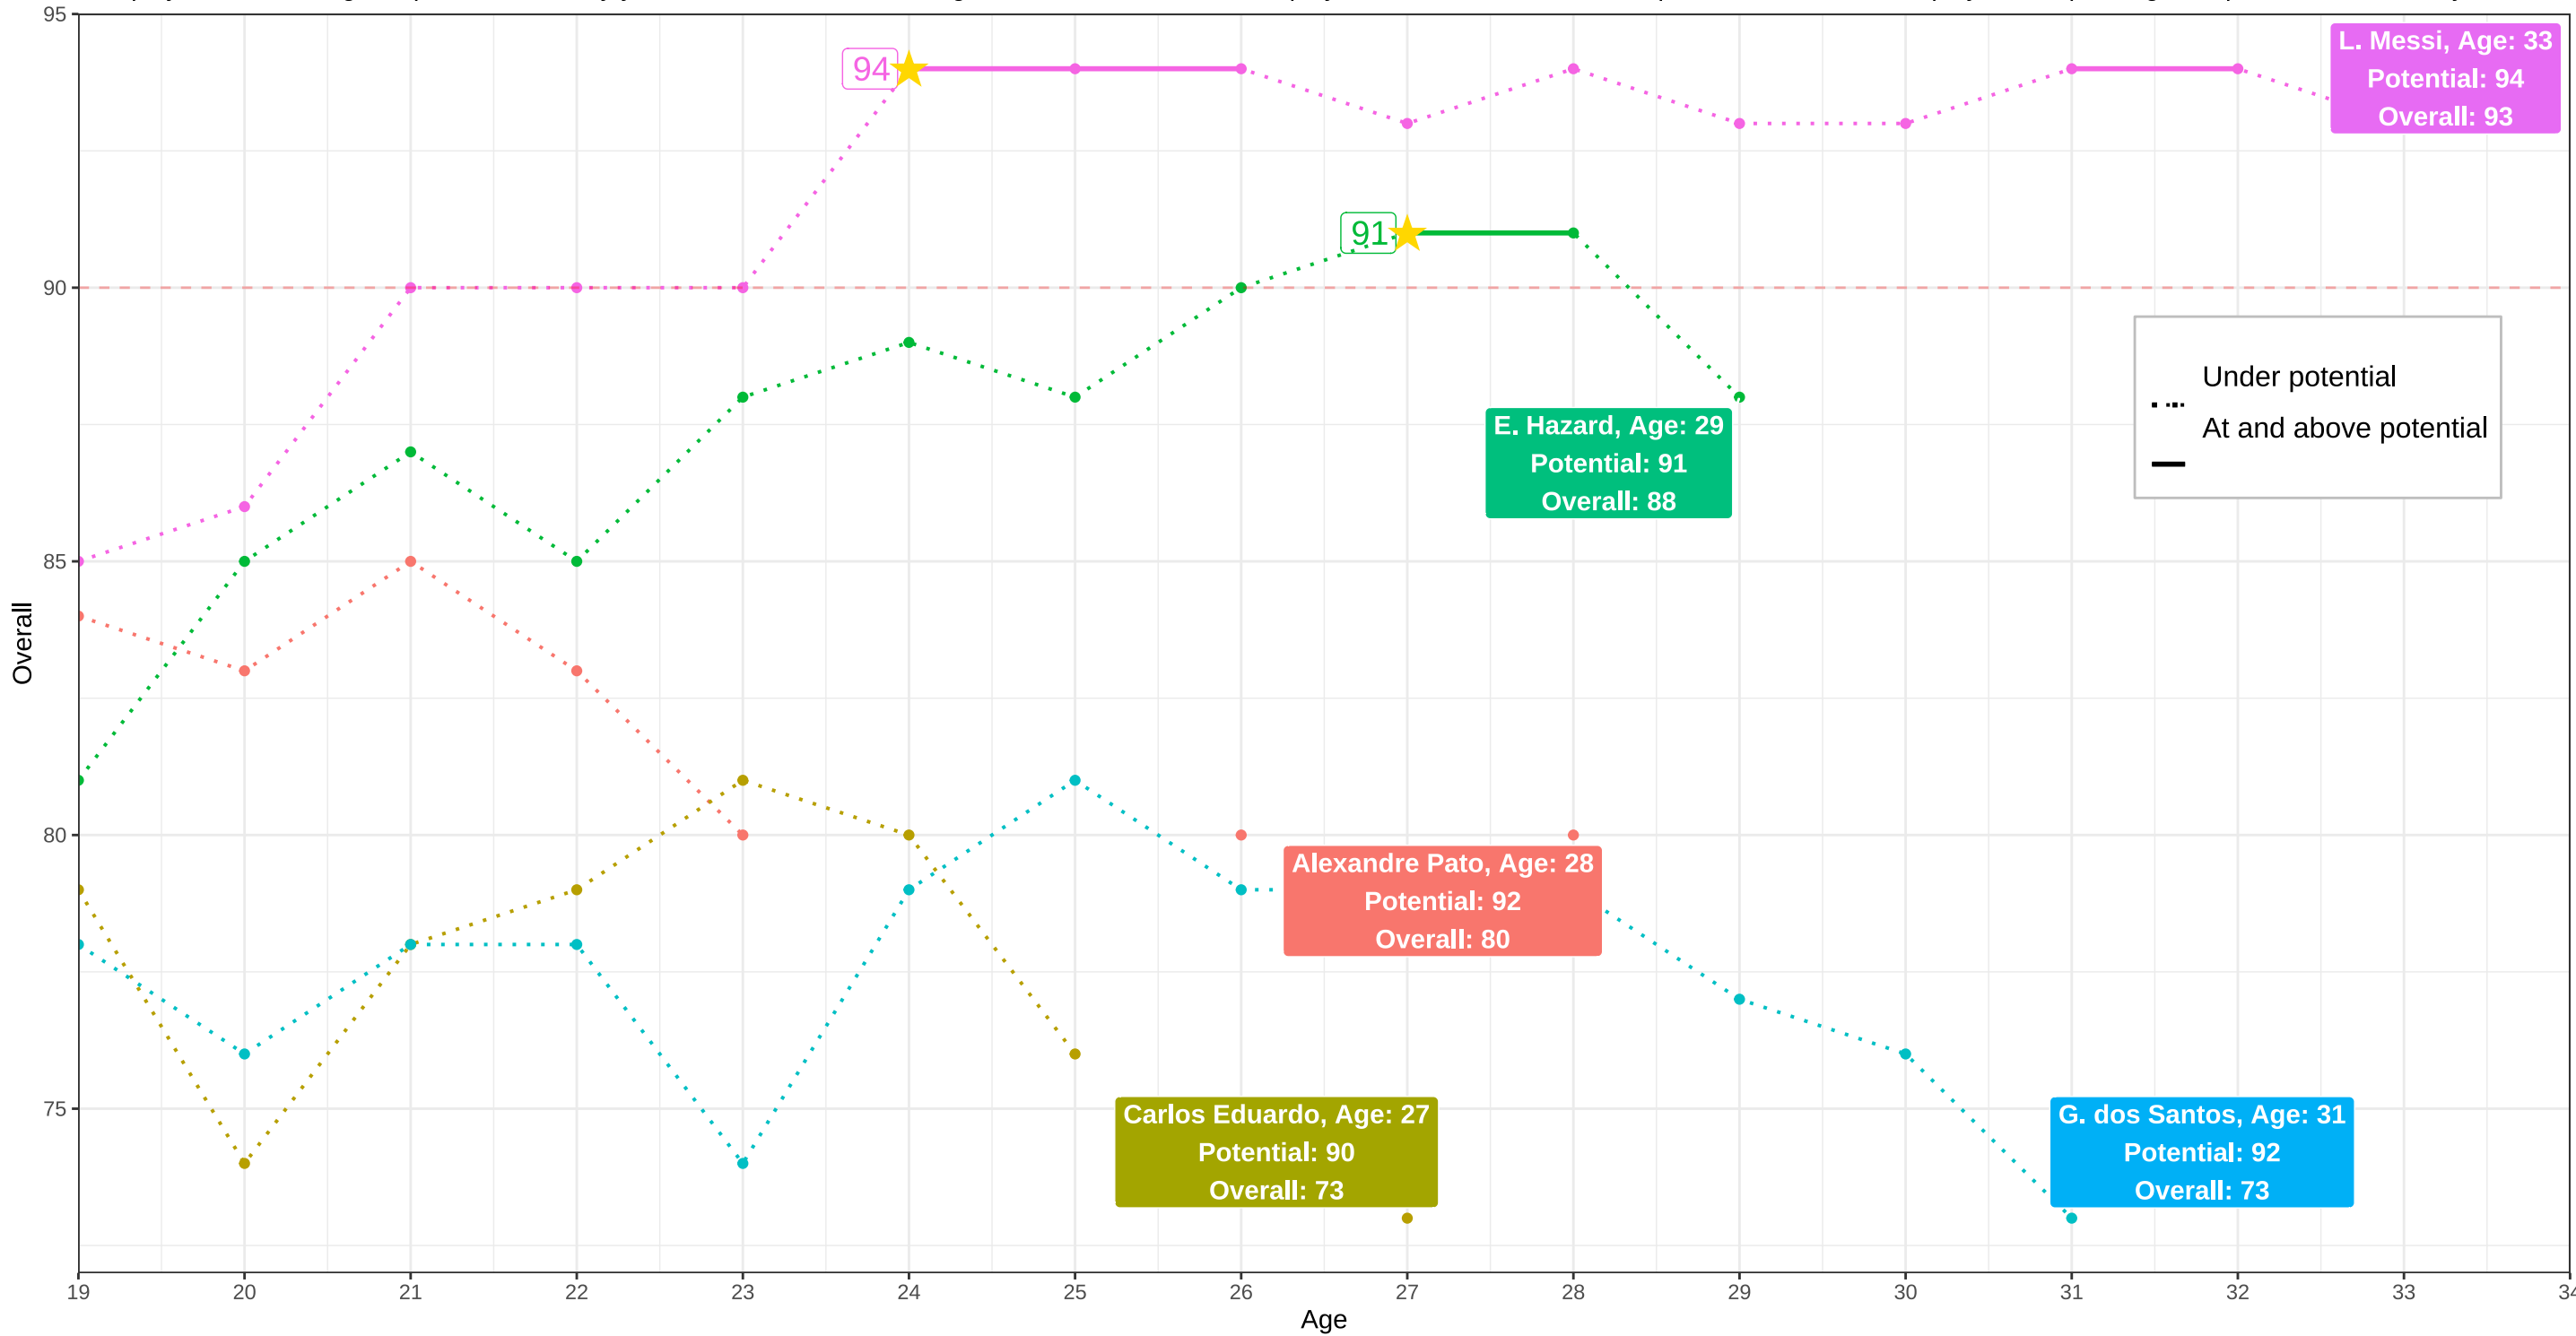

At which age are players reaching their prime?

449 players of the [84, 94] potential bracket reached their prime in the following age distribution.

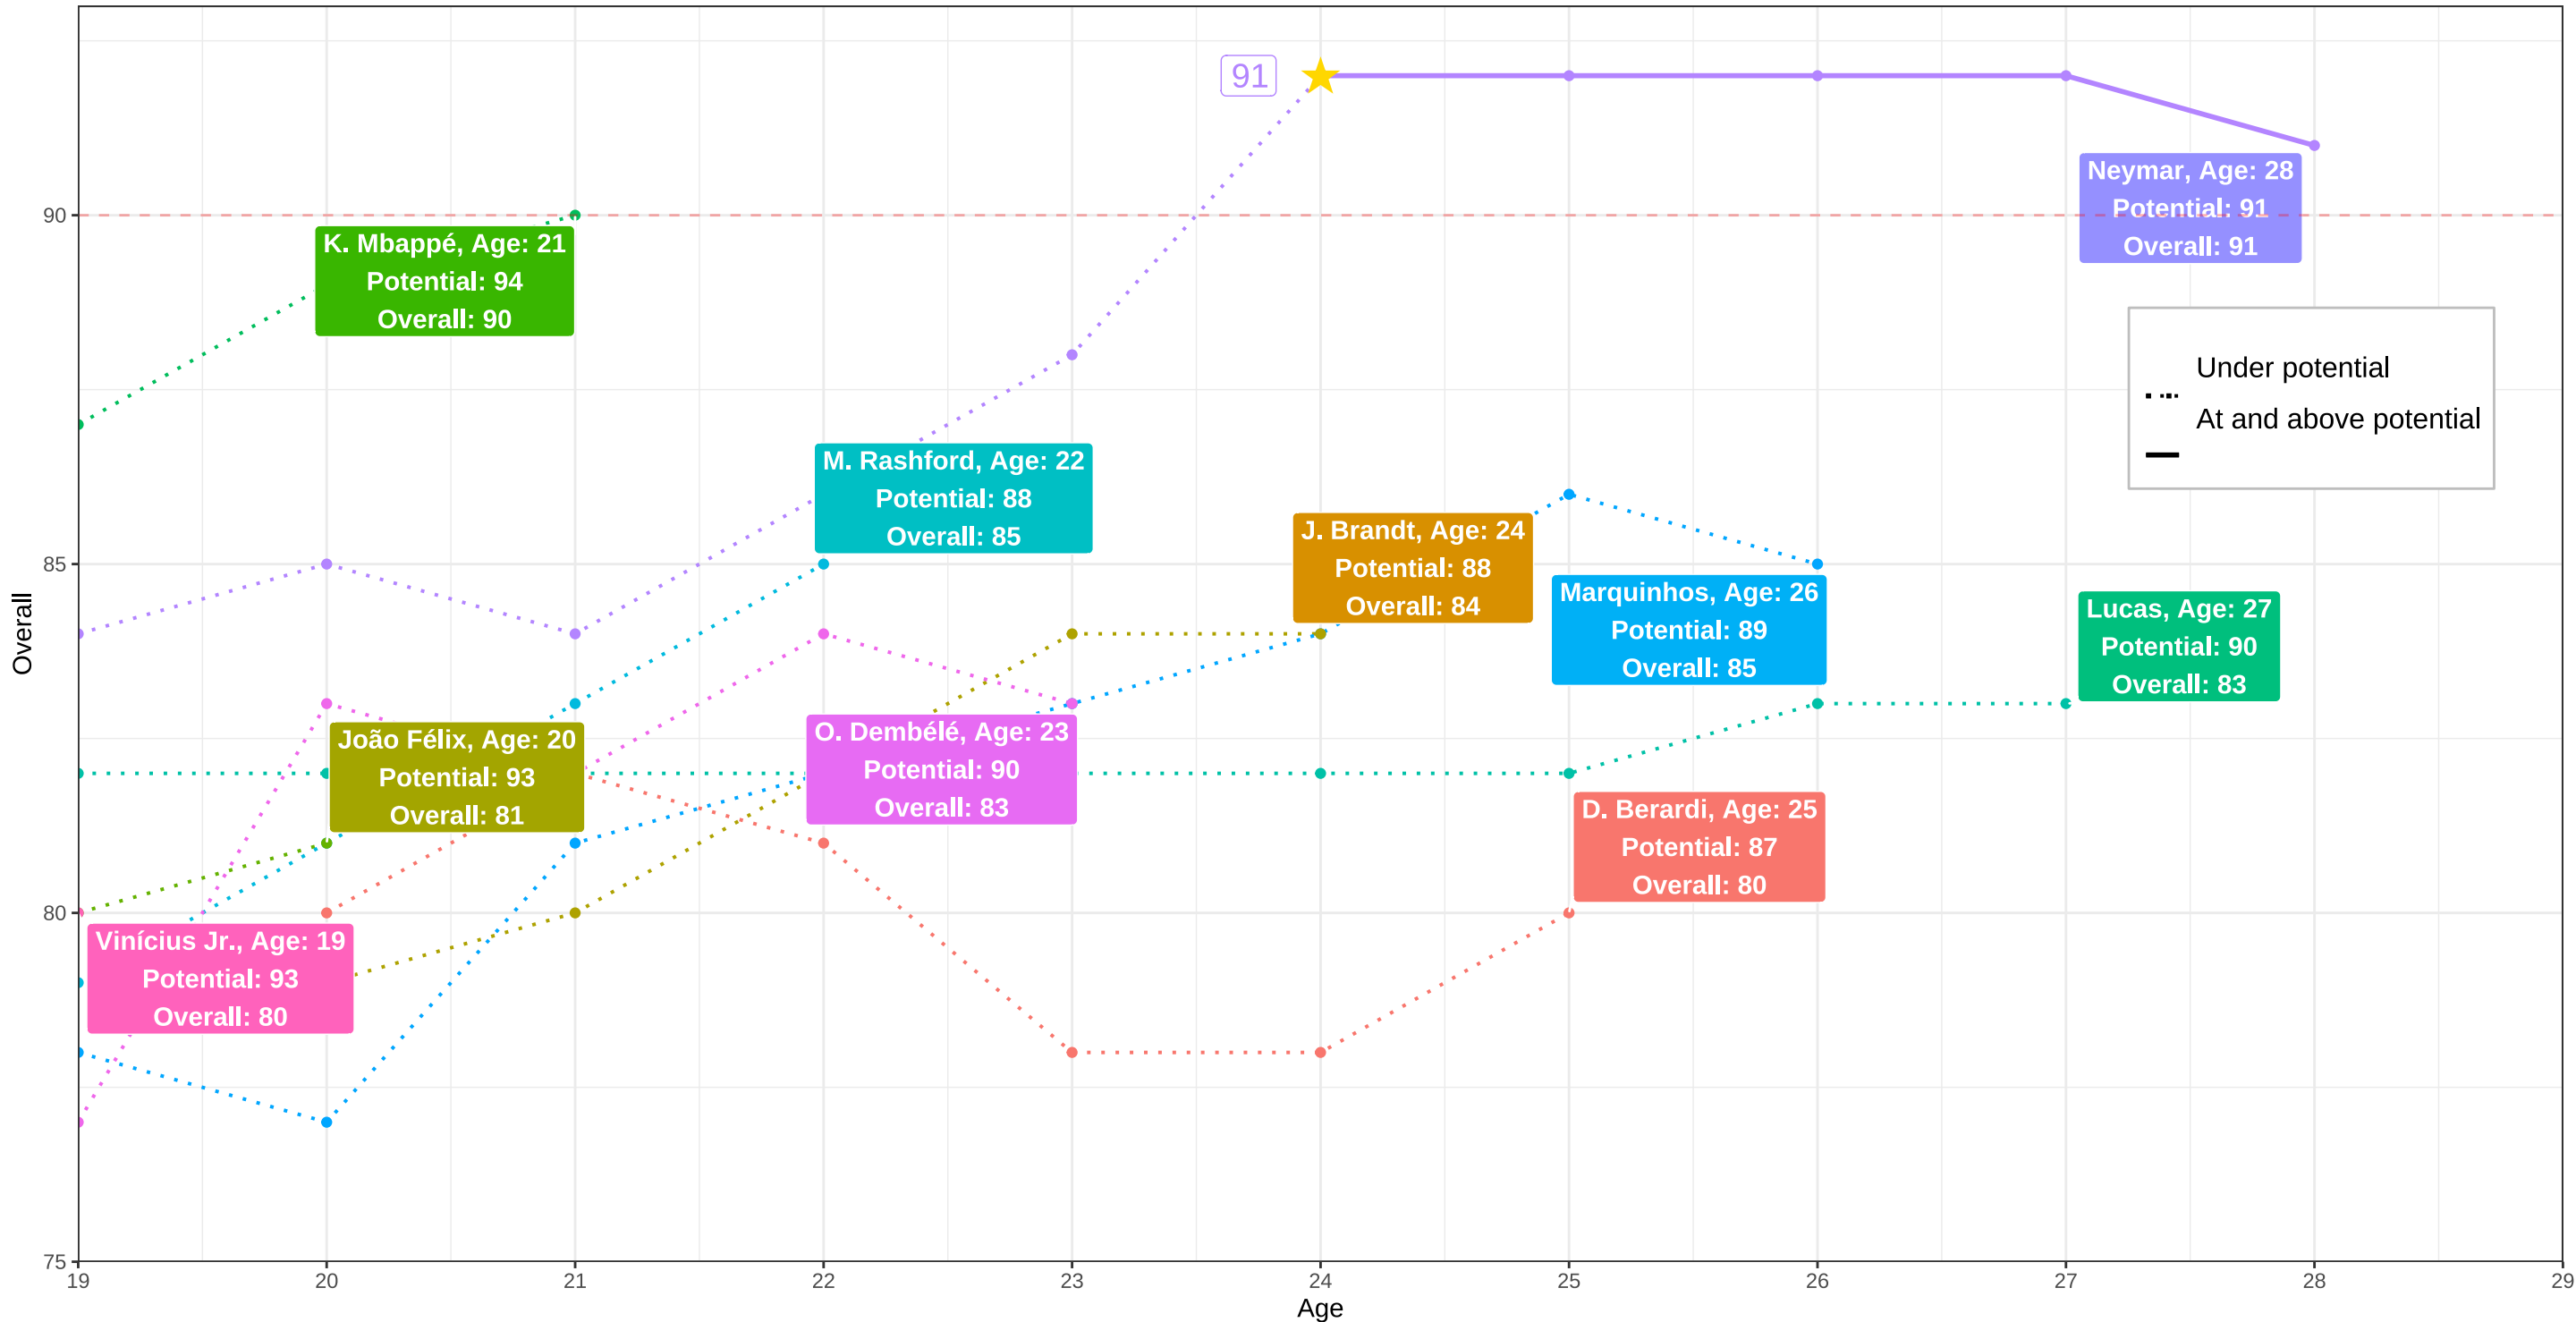

The Top 1: Do they always make it?

The players with the highest potential of every year: 2007 to 2011. Crossing the **dashed line** means the player has reached world class performance. Moreover, players are passing their potential at the **★** symbol.

The Top 1: Do they always make it?

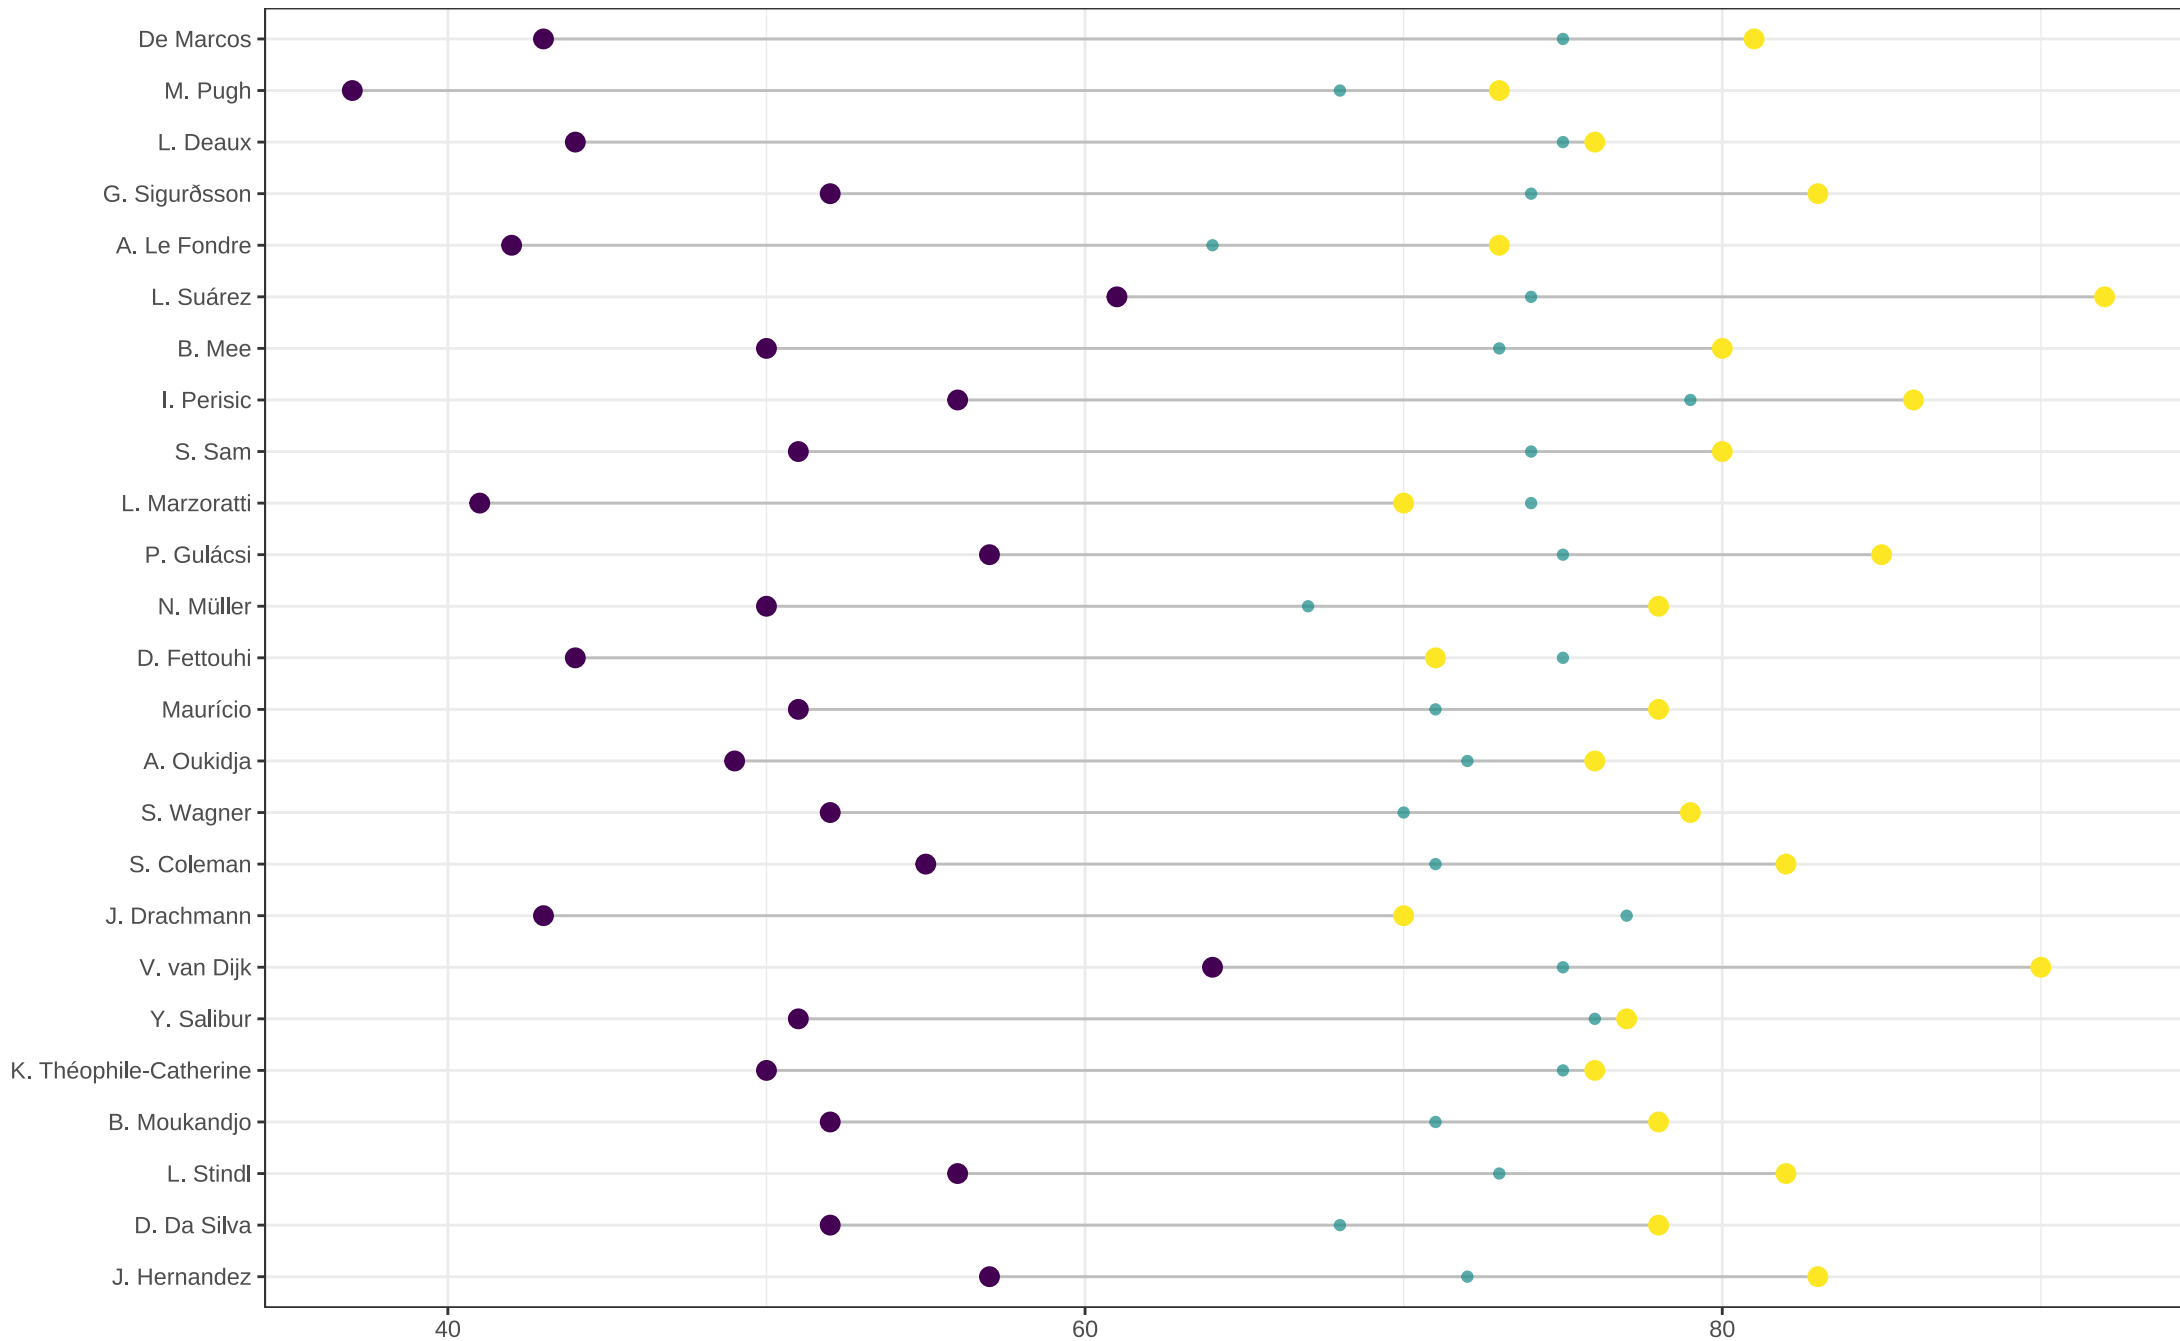

The players with the highest potential of every year: 2012 to 2021. Crossing the **dashed line** means the player has reached world class performance. Moreover, players are passing their potential at the **★** symbol.

Top 25: Players' Overall Progress

These players had the highest positive change in their overall

Overall at age 19 Potential Prime

Bottom 25: Players' Overall Progress

These players had the highest negative change in their overall.
